Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack product engineer with **2+ years of experience** designing user workflows, dashboards, and AI-enabled digital products, translating stakeholder requirements into responsive interfaces, documented solutions, and production-ready releases in **Agile** environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Data Retrieval, Operating Systems

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Shaped dashboard and data workflows for a **multi-tenant AI platform** used by **500+ users**, reducing latency from **1.2s to 350ms** while improving the clarity and responsiveness of user-facing experiences.
- Translated platform requirements into documented backend and interface-ready flows across FastAPI, Azure SQL, and cloud storage, supporting **1K+ AI jobs** and **5K+ monthly integrations**.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Designed a **React** grading dashboard with upload, history, and review views for **150+ instructors**, helping make multimodal AI outputs understandable through cleaner workflow design and feedback presentation.
- Built instructor-facing rubric, grading, and file-ingestion flows that handled **10K+ requests/day** and reduced feedback turnaround time by **60%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a **MERN**-based resource management platform with role-based workflows, notifications, and real-time updates, synchronizing **2M+ records** across distributed teams and business processes.
- Used analytics and iterative stakeholder feedback to refine platform flows, reducing resource wastage by **42%** and increasing lead conversions by **15%**.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Collaborated with Microsoft and GitHub stakeholders to document workflows, shape API behavior, and support release quality for a cross-platform product, improving response times by **30%**.
- Created testing and delivery workflows across Jenkins, PyTest, and AWS services, increasing pipeline efficiency by **68%** and reducing technical debt by **20%**.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Mapped end-to-end service-booking journeys and **presented the workflow architecture to the client**, aligning business needs across booking, payment, and analytics experiences for web and mobile.
- Built Flask APIs, Firebase sync, and payment interactions supporting **50K+ booking records**, improving confirmation speed by **40%** and reducing manual refund handling by **70%**.

Skills

Languages: JavaScript/TypeScript, Python, SQL, Java, C++
Design & Delivery: User Flows, Wireframes, Interactive Prototypes, Stakeholder Workshops, Solution Documentation, Agile/Lean UX
Tools & Platforms: React, Next.js, Flask, FastAPI, REST APIs, Figma, Miro, Adobe Creative Cloud, Git/GitHub
Product Areas: Responsive Design, Dashboard UX, Accessibility-Aware Design, AI-Powered Experiences, Data Visualization

Projects

PiXMod Live | *Next.js, CLIP, Stripe, MongoDB*
- Designed an AI-powered image platform with responsive editing flows, semantic search, and subscription journeys, processing **1K+ assets** while improving premium conversion by **18%**.

HMIS - Hospital Management Information System Live | *MERN, Twilio, TypeScript*
- Built user journeys, dashboards, and appointment-management flows for a healthcare platform supporting **100+ daily appointments**, reducing administrative workload by **30%**.

Big-Brain Live | *LLaMA-2, FAISS, Convex*
- Created a collaborative content platform for secure upload, semantic search, and real-time document interaction over **50K+ files**, reducing review time by **60%** for **200+ users**.
