Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with **2+ years of experience** building real-time product workflows, event-driven APIs, and transaction-heavy platforms, delivering low-latency full-stack systems across **TypeScript, React, SQL, cloud infrastructure, and CI/CD**.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Data Retrieval, Operating Systems

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Owned backend and dashboard flows for a **multi-tenant AI platform** used by **500+ users**, reducing latency from **1.2s to 350ms** through schema design, query tuning, and API optimization.
- Built async orchestration and ETL-style data pipelines across FastAPI, PostgreSQL, Azure SQL, and cloud storage, processing **1K+ AI jobs** and **5K+ monthly integrations** with **99%+ reliability**.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Developed **React** and Flask workflows for an instructor-facing grading product serving **150+ users**, handling **10K+ requests/day** across upload, rubric, and review flows.
- Implemented concurrent processing and stable backend APIs with AWS RDS and CI/CD, reducing turnaround time by **60%** while maintaining responsive UI behavior during peak usage.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a **MERN**-based resource management platform with **real-time updates**, REST APIs, and Azure SQL-backed services, synchronizing **2M+ records** across distributed business workflows.
- Used Google Analytics and experiment-driven iteration to improve lead and resource flows, reducing wastage by **42%** and increasing conversions by **15%**.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform API and data-sharing modules with automated build and validation pipelines, improving response times by **30%** and supporting high volumes of change across releases.
- Optimized ETL-style workflows with AWS Glue, S3, SQL, and CI/CD automation, increasing pipeline efficiency by **68%** and reducing technical debt by **20%**.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built a real-time booking and payment platform with Flask APIs, Firebase events, and webhook-driven status handling, supporting **50K+ records** with core latency below **200ms**.
- Improved booking confirmation speed by **40%** and reduced manual refund handling by **70%** through event-based updates, automation, and analytics-backed product iteration.

Skills

Languages: JavaScript/TypeScript, Python, **Golang**, SQL, Java, C++
Full Stack: React, Next.js, Flask, FastAPI, Node.js, REST APIs, WebSockets, Event-Driven Workflows
Streaming & Data: **Kafka**, **Apache Flink**, PostgreSQL, MySQL, Azure SQL, MongoDB
Cloud & Engineering: AWS, GCP, Docker, Kubernetes, CI/CD, Git/GitHub, Jenkins, Testing Automation, Low-Latency Systems

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a full-stack fintech platform for **50K+ users** and **1M+ transactions**, delivering real-time transaction flows, secure account linking, and advanced filtering under high-volume usage.

Big-Brain Live | *FAISS, Pinecone, PostgreSQL, GCP*
- Engineered a cloud-based ingestion and indexing pipeline over **50K+ documents**, reducing retrieval latency by **40%** and enabling sub-second semantic search and summarization workflows.

HMIS - Hospital Management Information System Live | *MERN, TypeScript, Twilio*
- Built workflow-driven appointment and notification systems supporting **100+ daily appointments**, combining real-time updates, consent-based flows, and operational dashboards to reduce administrative workload by **30%**.
