Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Solutions-oriented engineer with **2+ years of experience** building AI-enabled SaaS workflows, APIs, and user-facing platforms, with strong customer discovery, stakeholder communication, and demo-ready product thinking across content, healthcare, and business process systems.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Data Retrieval, Operating Systems

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Built a **multi-tenant AI education platform** for **500+ users**, shaping dashboard and data workflows that reduced latency from **1.2s to 350ms** and improved usability for internal stakeholders.
- Translated platform requirements into reliable backend workflows across FastAPI, Azure SQL, and cloud storage, processing **1K+ AI jobs** and **5K+ monthly integrations** with **99%+ reliability**.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Developed an AI-powered grading platform serving **150+ instructors**, building React dashboards and backend workflows that supported **10K+ grading requests/day** and reduced turnaround time by **60%**.
- Helped shape instructor-facing rubric, upload, and grading flows using multimodal AI, making complex model outputs usable through clear interfaces, feedback views, and operational APIs.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Partnered with Microsoft and GitHub stakeholders to deliver a cross-platform data-sharing product, writing APIs, documenting workflows, and improving response times by **30%**.
- Supported testing, CI/CD, and production-ready release quality across Jenkins, PyTest, AWS Glue, and S3, increasing pipeline efficiency by **68%** and reducing technical debt by **20%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a **MERN**-based resource management platform with real-time updates, role-based workflows, and CRM-style dashboards, synchronizing **2M+ records** across distributed business operations.
- Used analytics, automated testing, and iterative product feedback to reduce resource wastage by **42%** and increase lead conversions by **15%**.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Designed the end-to-end workflow for a service-booking platform and **presented the architecture to the client**, aligning product requirements with booking, payment, and analytics use cases across web and mobile.
- Built Flask APIs and real-time Firebase workflows supporting **50K+ booking records**, improving confirmation speed by **40%** and reducing manual refund handling by **70%**.

Skills

Languages: Python, JavaScript/TypeScript, Java, SQL, C++
Solutions & Product: Product Demos, Solution Discovery, Stakeholder Communication, Technical Presentations, Workflow Design
Platforms: React, Flask, FastAPI, Node.js, REST APIs, Salesforce-style CRM Workflows, AI/LLM Applications
Tools: PostgreSQL, MySQL, Azure SQL, AWS, Docker, Git/GitHub, Jenkins, Slack, Zoom

Projects

Big-Brain Live | *LLaMA-2, FAISS, PostgreSQL, Convex*
- Built an AI-powered content platform for secure document upload, semantic search, and real-time collaboration over **50K+ documents**, reducing document review time by **60%** and enabling demo-ready content workflows for **200+ users**.

HMIS - Hospital Management Information System Live | *MERN, ABDM APIs, Twilio*
- Built a workflow-driven healthcare platform with dashboards, consent-based record access, and automated communications, supporting **100+ daily appointments** and reducing administrative workload by **30%**.

PiXMod Live | *Next.js, CLIP, Stripe, MongoDB*
- Created an AI-powered SaaS platform for content editing, image search, and subscription workflows, processing **1K+ edited assets** while improving premium conversion by **18%** through a polished user-facing experience.
