Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years of experience building **dealer-facing and analytics-style web products** across **React, JavaScript/TypeScript, Java, SQL, and AWS**, delivering clean APIs, performant UIs, and distributed microservice workflows with fast iteration and strong code quality.

Education

University of Southern California **Los Angeles, CA**
Master of Science in Computer Science *August 2024 – May 2026*
GPA: 3.75/4 Coursework: Analysis of Algorithms, Database Systems, Web Technologies

PDEU
B.Tech. in Computer Science and Engineering *Nov 2020 – May 2024*
GPA: 3.88/4 Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Built and deployed data-product features across **FastAPI**, **Azure SQL**, **PostgreSQL**, and cloud storage for 500+ users, reducing dashboard latency from 1.2s to 350ms through schema and query optimization.
- Implemented distributed background-job and integration workflows for 5K+ monthly tasks with validation and release safeguards, improving throughput 3x while sustaining 99%+ production reliability.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Developed front-end and API workflows with **Flask** + **React**, secure file ingestion, and modular services, handling 10K+ daily requests for 150+ users in production.
- Built concurrent processing and deployment flows on **AWS RDS** with CI/CD-backed releases, cutting turnaround time by 60% while maintaining stable API response under peak load.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered microservice-based APIs and data workflows using **Python**, OOP patterns, and **AWS Glue/S3**, improving response times by 30% and pipeline efficiency by 68% in a distributed production codebase.
- Maintained 20+ unit and integration suites with Jenkins, PyTest, and Mockito, strengthening code review quality, debugging, and release reliability in Agile Scrum cycles.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a MERN-based engagement platform with **REST APIs**, WebSockets, and microservices, supporting 8+ business workflows and 2M+ synchronized records in a user-facing experience.
- Implemented modular auth, billing, and notification services with **Jenkins**, **Docker**, and Azure SQL-backed workflows, reducing deployment time by 50% and sustaining 95%+ successful build validation.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built backend APIs and real-time synchronization flows for a booking and payments platform across 50K+ records, covering reservations, pricing, and payment status in a customer-facing product.
- Mapped 12+ integration points and implemented webhook-driven flows with Firebase, supporting independent delivery, rapid iteration, and cross-functional collaboration with product stakeholders.

Skills

Languages: JavaScript/TypeScript, Java, Python, SQL, C++
Frontend: React.js, Next.js, TailwindCSS, HTML/CSS, Component Architecture, Performance Optimization
Backend & APIs: FastAPI, Flask, Node.js, Express.js, REST APIs, JSON, OOP, Microservices
Databases: PostgreSQL, MySQL, MongoDB, SQL Server, Azure SQL, Query Optimization, Data Modeling
Cloud & Infrastructure: AWS (RDS, S3, Glue), Microsoft Azure, Docker, Kubernetes, Jenkins, Git/GitHub
AI/ML: LLM Systems, AI Coding Assistants, Prompt Engineering, Intelligent Automation
Engineering Practices: Distributed Systems, CI/CD, Unit Testing, Integration Testing, Complexity-Aware Problem Solving, Agile/Scrum, Independent Shipping

Projects

FinNexus | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a dealer-style analytics and transaction product with real-time updates and secure controls, supporting 50K+ users and 1M+ transactions across a distributed deployment stack.

Chat2SQL | *Java, TypeScript, SQL, Docker, Maven*
- Built an AI-assisted data workspace across a **Java** + **TypeScript** codebase, supporting 10+ databases and accelerating schema exploration, query authoring, and analytics workflows.

PiXMod | *Next.js, TailwindCSS, MongoDB, Stripe, Transformers*
- Built an AI-powered web product with responsive UI components and scalable storage, improving premium conversion by 18% through faster iteration and user-focused feature delivery.
