Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building high-traffic user applications across frontend and backend, with experience in mobile-adjacent product workflows, REST API integration, Java/Python services, testing, CI/CD, and performance-focused debugging.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Built and maintained cloud-hosted application services across **Azure SQL/PostgreSQL** for 500+ users, reducing dashboard latency from 1.2s to 350ms.
- Implemented validation and release workflows for 5K+ monthly jobs with reconciliation checks, improving reliability and post-deployment support readiness.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Developed and tested a Flask + React application handling **10K+ daily requests**, integrating modular REST APIs and user-facing experiences in agile delivery cycles.
- Improved concurrent request processing and CI/CD release flows with GitHub Actions, reducing turnaround time by 60% while maintaining stable API behavior.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 - May 2025*
- Built Python experimentation/simulation pipelines processing **100K+ trajectory logs**, with reproducible testing and structured technical documentation.
- Troubleshot model and data pipeline issues with monitored outputs, improving debugging turnaround and handoff quality across teams.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Engineered API and ETL services with OOP, AWS Glue, and S3; improved response time by 30% and pipeline efficiency by 68% through iterative fixes.
- Maintained 20+ unit/integration suites with Jenkins, PyTest, and Mockito across 3 OS environments, improving release quality and regression confidence.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Built a MERN platform with REST APIs and WebSockets supporting 8+ workflows and 2M+ synchronized records with stable backend integration.
- Automated deployment/testing with Jenkins and Docker, reducing deployment time by 50% and improving consistency across release cycles.

Skills

Languages: Java, JavaScript/TypeScript, Python, SQL, C++
Mobile & UI: Flutter/Dart familiarity, React.js, responsive UI development, UI/UX implementation from wireframes
Backend & APIs: Flask, FastAPI, Node.js, Express.js, REST APIs, JSON, OO programming
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Azure SQL
Tooling: Git, GitHub Actions, Jenkins, Docker, Kubernetes, CI/CD, agile/scrum
Quality: Unit/integration testing, code reviews, performance tuning, debugging, production support, documentation

Projects

HMIS | *MERN, TypeScript, ABDM APIs, Twilio*
- Designed structured healthcare workflows and user-facing interfaces with API integrations, supporting 100+ daily appointments and improving record retrieval by 2x.

FinNexus | *Next.js, TypeScript, MongoDB, Kubernetes*
- Built secure, high-traffic application workflows for 50K+ users and 1M+ transactions with real-time updates and scalable deployment architecture.

Chat2SQL | *Java, TypeScript, SQL, Maven, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases with schema-aware query generation and reliable cross-service backend integration.
