Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years of experience building backend applications across **Python, Java, SQL, and JavaScript**, delivering **REST APIs**, testable services, and secure data workflows in Agile environments with strong ownership of debugging, documentation, and release quality.

Education

University of Southern California **Los Angeles, CA**
Master of Science in Computer Science *August 2024 – May 2026*
GPA: 3.75/4 Coursework: Analysis of Algorithms, Database Systems, Web Technologies

PDEU
B.Tech. in Computer Science and Engineering *Nov 2020 – May 2024*
GPA: 3.88/4 Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Built and optimized backend data services across **Azure SQL**, **PostgreSQL**, and **SQL Server** for a multi-tenant platform serving 500+ users, reducing dashboard latency from 1.2s to 350ms through schema design, indexing, and query tuning.
- Developed **FastAPI**-based job orchestration and ETL-style integration flows for 5K+ monthly jobs with validation, reconciliation checks, and CI/CD-backed releases, sustaining 99%+ production reliability.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Developed and tested backend APIs for an AI grading platform using **Flask**, REST services, and **AWS RDS**, handling 10K+ daily grading requests with secure ingestion for PDF, DOCX, and ZIP submissions.
- Implemented concurrent processing, rubric workflows, and **GitHub Actions CI/CD** to improve response stability and cut feedback turnaround time by 60% for 150+ instructors.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Built and maintained cross-platform microservice components with 20+ unit/integration suites using **Jenkins**, **PyTest**, and **Mockito**, improving release confidence across Windows, Linux, and macOS environments.
- Optimized large-scale API and ETL workflows using **OOP** patterns, **AWS Glue**, and **S3**, improving response times by 30% and pipeline efficiency by 68% while reducing technical debt by 20%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed a MERN-based operations platform with **REST APIs**, WebSockets, and **Azure SQL**-backed services, supporting 8+ business workflows and 2M+ synchronized records in a modular architecture.
- Automated deployments and test validation with **Jenkins** and **Docker**, reducing deployment time by 50% and sustaining 95%+ successful build validation across release runs.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **Flask** backend APIs for a service-booking and payments platform, covering booking, reservation, coupon, and payment-status workflows across 50K+ records with sub-200ms API performance.
- Integrated PCI-aware payment flows, Firebase synchronization, and webhook-driven updates for multi-currency transactions, reducing manual payment handling by 70% and improving client alignment across 12+ integration points.

Skills

Languages: Python, Java, C++, JavaScript/TypeScript, SQL, HTML
Backend & APIs: FastAPI, Flask, Node.js, Express.js, REST APIs, JSON, OOP
Frontend: React.js, Next.js, Angular.js, TailwindCSS, HTML/CSS
Databases: PostgreSQL, MySQL, MongoDB, SQL Server, Azure SQL
Cloud & Infrastructure: AWS (RDS, S3, Glue), Microsoft Azure, Docker, Kubernetes, Jenkins, Git/GitHub
AI/ML: LLM Systems, Prompt Engineering, AI Coding Tools, OpenAI/Claude Workflows
Engineering Practices: CI/CD, Unit Testing, Integration Testing, SDLC, Agile, System Design, Performance Optimization

Projects

FinNexus | *Next.js, TypeScript, MongoDB, Kubernetes*
- Built a fintech platform for 50K+ users and 1M+ transactions with Plaid, real-time updates, and token-based access controls, combining secure transaction workflows with **CI/CD**-backed deployment.

Chat2SQL | *Java, TypeScript, SQL, Docker, Maven*
- Built an AI-powered SQL workspace across a **Java** + **TypeScript** codebase, supporting 10+ databases and accelerating query authoring, schema exploration, and structured execution in enterprise-style environments.

HMIS | *MERN, TypeScript, ABDM APIs, Twilio*
- Designed a healthcare workflow platform with consent-based APIs and OOP-driven services, supporting 100+ daily appointments while reducing record retrieval time by 2x and administrative workload by 30%.
