Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Web-focused software engineer with 2+ years of experience building and maintaining responsive interfaces and API-backed web applications using **HTML, CSS, JavaScript/TypeScript, React, Flask, SQL**, with emphasis on accessibility, cross-browser reliability, and collaborative delivery.

Education

University of Southern California **Los Angeles, CA**
Master of Science in Computer Science *August 2024 – May 2026*
GPA: 3.75/4 Coursework: Web Technologies, Analysis of Algorithms, Database Systems

Pandit Deendayal Energy University **Gandhinagar, India**
Bachelor of Technology in Computer Science and Engineering *November 2020 – May 2024*
GPA: 3.88/4 Coursework: Software Engineering, Object-Oriented Programming, Operating Systems

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Maintained and optimized web-facing backend services across Azure SQL/PostgreSQL for a multi-tenant platform serving 500+ users, reducing dashboard latency from 1.2s to 350ms.
- Implemented release-safe validation workflows for 5K+ monthly jobs, improving production reliability for institution-facing web tools and reporting interfaces.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Built and tested a **Flask + React** platform processing 10K+ daily requests with modular APIs, secure file ingestion, and instructor-facing workflows.
- Improved UI/API performance and deployment reliability via GitHub Actions CI/CD, reducing grading turnaround time by 60% while sustaining stable peak traffic behavior.

LST Capitals **India**
Web Developer Intern *November 2024 – January 2025*
- Developed booking and payment web interfaces plus backend API integrations for a user-facing platform handling 50K+ records with robust validation and workflow automation.
- Implemented modular auth, billing, and webhook workflows, improving deployment predictability and production support quality across cross-functional teams.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Analyzed and enhanced API-backed web workflows with OOP patterns and ETL support, improving response times by 30% and strengthening platform reliability.
- Collaborated with developers and QA in Agile cycles to ship tested updates with Jenkins/PyTest automation, raising pipeline efficiency by 68%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a MERN web platform with REST APIs and WebSockets supporting 8+ business workflows and 2M+ synchronized records across operations dashboards.
- Automated deployment and validation with Jenkins and Docker, reducing release time by 50% and supporting consistent cross-environment behavior.

Skills

Languages: JavaScript/TypeScript, Python, Java, C++, SQL
Web: HTML, CSS, React.js, Next.js, Node.js, Express.js, REST APIs, JSON
Backend & Data: Flask, FastAPI, PostgreSQL, MySQL, SQL Server, MongoDB, Azure SQL
Tooling: Git, GitHub Actions, Jenkins, Docker, Kubernetes, CI/CD, Agile/Scrum
Quality: Cross-browser testing, accessibility-aware development, debugging, unit/integration testing
Additional: CMS familiarity, server-side scripting concepts (**PHP**), technical documentation

Projects

HMIS | *MERN, TypeScript, ABDM APIs, Twilio*
- Designed responsive healthcare workflows with structured APIs and monitoring-backed operations, supporting 100+ daily appointments and reducing record retrieval time by 2x.

FinNexus | *Next.js, TypeScript, MongoDB, Kubernetes*
- Built secure, responsive fintech web experiences for 50K+ users with real-time updates, transaction filtering, and scalable deployment workflows.

PiXMod | *Next.js, Stripe, MongoDB, TailwindCSS*
- Developed a production web SaaS UI with image workflows, billing integration, and maintainable component architecture for scalable feature delivery.
