Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years of experience building SQL-backed backend and full-stack applications, delivering REST APIs, integration workflows, and tested releases in Agile teams. Strong in **Java**, **Spring Boot**, **SQL**, **React**, **CI/CD**, and enterprise-style reporting and financial workflow systems.

Education

University of Southern California **Los Angeles, CA**
Master of Science in Computer Science *August 2024 – May 2026*
GPA: 3.75/4 Coursework: Analysis of Algorithms, Database Systems, Web Technologies

Pandit Deendayal Energy University **Gandhinagar, In**
Bachelor of Technology in Computer Science and Engineering *November 2020 – May 2*
GPA: 3.88/4 Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Architected a **multi-tenant SQL platform** across **Azure SQL**, **PostgreSQL**, and **SQL Server** with normalized schemas and indexed access patterns for 500+ users, reducing dashboard latency from **1.2s to 350ms**.
- Built **FastAPI** integration services and validation pipelines for 5K+ monthly jobs, adding reconciliation checks, release automation, and failure isolation to maintain **99%+ production reliability**.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Developed a **Flask + React** grading platform with modular REST workflows, instructor-facing dashboards, and **MySQL/AWS RDS**-backed services that handled **10K+ submissions** for 150+ instructors.
- Implemented concurrent backend processing, secure file-ingestion paths, and **GitHub Actions CI/CD**, sustaining **10K+ grading requests/day** while cutting feedback turnaround time by **60%**.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform microservice software with **Jenkins**, **PyTest**, and **Mockito**, maintaining build, test, and release flows across **3 operating systems** with 20+ unit and integration suites in an **Agile Scrum** environment.
- Optimized API and ETL components using **OOP design patterns**, **AWS Glue**, and **S3**, improving response times by **30%** and pipeline efficiency by **68%** while collaborating with Microsoft and GitHub stakeholders.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a **MERN**-based resource-management platform with **REST APIs**, **WebSockets**, and microservices, supporting 8+ core workflows and synchronizing **2M+ records** with **33% fewer sync conflicts**.
- Automated **Azure SQL**-backed deployments with **Jenkins** and Docker-based packaging, improving release stability, reducing deployment time by **50%**, and reaching **95%+ build validation**.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built backend APIs and workflow logic for a service-booking application covering reservations, payment status, pricing, and webhook-driven updates across **50K+ booking records**.
- Integrated a **PCI-compliant payment stack** supporting cards, wallets, UPI, and PayPal, cutting manual payment handling by **70%** while improving transaction visibility and refund/dispute workflows.

Skills

Languages: Java, Python, C++, JavaScript/TypeScript, SQL
Backend & APIs: Spring Boot, Java/J2EE, Flask, FastAPI, Node.js, Express.js, REST APIs, JSON, XML, SOAP
Frontend: React.js, Next.js, TailwindCSS, HTML, CSS, Angular.js
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Azure SQL, Relational Data Modeling, Query Optimization
Cloud & Infrastructure: AWS (S3, RDS, Glue), Microsoft Azure, Docker, Kubernetes, Tomcat, Linux, Databricks
Engineering Practices: CI/CD, JUnit, Mockito, Hibernate/ORM, Agile, Microservices, ETL Pipelines, Design Patterns, System Design, Debugging

Projects

Chat2SQL | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace on top of the Chat2DB project, working across a **Java + TypeScript** codebase to support 10+ databases, schema exploration, and optimized query generation in enterprise-style environments.

FinNexus | *Next.js, TypeScript, Kubernetes, MongoDB, Plaid*
- Built a fintech platform supporting **50K+ users** and **1M+ transactions** with secure bank linking, real-time synchronization, and production-style deployment workflows for transaction-heavy financial use cases.

HMIS | *MERN, TypeScript, ABDM APIs, Twilio*
- Designed a microservice-based workflow platform with structured schemas, API integrations, and OOP-based modules that supported **100+ daily appointments** and cut record retrieval time by **2x**.
