Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years of experience building **enterprise-style web applications** across **Python, JavaScript/TypeScript, SQL, React, and Azure**, delivering reliable APIs, responsive interfaces, and Agile team contributions with strong focus on testing, quality, and on-time delivery.

Education

University of Southern California **Los Angeles, CA**
Master of Science in Computer Science *August 2024 – May 2026*
GPA: 3.75/4 Coursework: Analysis of Algorithms, Database Systems, Web Technologies

PDEU
B.Tech. in Computer Science and Engineering *Nov 2020 – May 2024*
GPA: 3.88/4 Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Developed and maintained backend application features across **Azure SQL**, **PostgreSQL**, and **SQL Server** for a multi-tenant platform serving 500+ users, reducing dashboard latency from 1.2s to 350ms through schema and query optimization.
- Contributed production-ready workflows for 5K+ monthly tasks with validation, reconciliation checks, and CI/CD-backed releases, improving throughput 3x while sustaining 99%+ reliability.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Developed user-facing application workflows with **Flask** + **React**, secure file ingestion, and modular APIs, handling 10K+ daily requests for 150+ instructors in production.
- Built concurrent processing and release workflows on **AWS RDS** with CI/CD-backed deployments, cutting turnaround time by 60% while maintaining stable API response under peak load.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered microservice-based APIs and SQL-backed data workflows using **Python**, OOP patterns, and **AWS Glue/S3**, improving response times by 30% and pipeline efficiency by 68% in an Agile production codebase.
- Maintained 20+ unit and integration suites with Jenkins, PyTest, and Mockito, supporting code reviews, backlog work, and release quality across distributed Scrum delivery cycles.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a MERN-based operations platform with **REST APIs**, WebSockets, and microservices, supporting 8+ business workflows and 2M+ synchronized records in a responsive user-facing system.
- Implemented modular auth, billing, and notification services with **Jenkins**, **Docker**, and Azure SQL-backed workflows, reducing deployment time by 50% and sustaining 95%+ successful build validation.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built backend APIs and real-time synchronization flows for a service-booking platform across 50K+ records, covering booking, reservation tracking, pricing, coupons, and payment status in a customer-facing application.
- Mapped 12+ integration points and implemented payment webhooks plus Firebase-backed workflows, aligning technical decisions with business requirements and delivery timelines.

Skills

Languages: Python, JavaScript/TypeScript, Java, SQL, C++
Backend & APIs: FastAPI, Flask, Node.js, Express.js, REST APIs, JSON, OOP, SDLC Concepts
Frontend: React.js, Angular.js, Next.js, TailwindCSS, HTML/CSS, Responsive UI Design
Databases: PostgreSQL, MySQL, MongoDB, SQL Server, Azure SQL, Relational Data Modeling, SSIS/SSRS Concepts
Cloud & Infrastructure: AWS (RDS, S3, Glue), Microsoft Azure, Docker, Jenkins, Git/GitHub, DevOps Practices
AI/ML: LLM Systems, AI Coding Assistants, Prompt Engineering, Intelligent Automation
Engineering Practices: Agile/Scrum, TDD, CI/CD, Unit Testing, Integration Testing, Work Estimation, Backlog Grooming, Code Review

Projects

HMIS | *MERN, ABDM APIs, TypeScript, Twilio*
- Built a healthcare workflow platform with consent-based APIs and structured data flows, supporting 100+ daily appointments while reducing patient record retrieval time by 2x in a care-focused system.

Chat2SQL | *Java, TypeScript, SQL, Docker, Maven*
- Built an AI-assisted data workspace across a **Java** + **TypeScript** codebase, supporting 10+ databases and accelerating schema exploration, query authoring, and structured execution in enterprise-style environments.

FinNexus | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a full-stack fintech product with real-time updates, secure transaction controls, and scalable deployment across a distributed stack supporting 50K+ users and 1M+ transactions.
