Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with **2+ years of experience** shipping full-stack and backend-heavy marketplace-style products, building recruiter- and operator-facing workflows, payments, automation, and data-backed systems that drive measurable user outcomes.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Designed and optimized multi-tenant platform schemas across **Azure SQL, PostgreSQL, and SQL Server** for **500+ users** and **10K+ records**, reducing dashboard latency by **71%** (**1.2s to 350ms**).
- Built async product workflows with **FastAPI**, cloud storage, and background orchestration, processing **5K+ monthly jobs** with **99%+** reliability and **3x** higher throughput under concurrent load.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Built a recruiter-style operations platform for **150+ instructors** using **React, Flask, MySQL, and AWS RDS**, supporting self-serve uploads, review workflows, and **10K+ requests/day**.
- Designed concurrent backend automation for onboarding-like grading flows, secure file ingestion, and performance tracking, reducing turnaround time by **60%** while keeping user-facing operations stable at peak load.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform microservices with reusable OOP modules and **20+** unit/integration suites using **Jenkins, PyTest, and Mockito**, improving release quality across fast-moving delivery cycles.
- Optimized APIs and ETL workflows with **AWS Glue, S3, and SQL**, improving response times by **30%**, pipeline efficiency by **68%**, and reducing technical debt by **20%**.

Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a **MERN**-based business platform with **React**, WebSockets, and microservices across **8** workflows for allocation, billing, lead management, and notifications, synchronizing **2M+ records**.
- Implemented analytics-driven product improvements and CI-backed releases with **Jenkins, Docker, and Azure SQL**, reducing resource wastage by **42%** and increasing lead conversions by **15%**.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built a two-sided service-booking platform with **React**, **TypeScript**, **Flask**, and Firebase, supporting **50K+ records**, sub-**200ms** booking APIs, and **40%** faster confirmation flows.
- Designed payment, pricing, coupon, and webhook workflows that improved provider-customer coordination, reduced manual refund handling by **70%**, and powered hourly operational analytics through **Databricks** and Spark.

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, C++
Frontend & Product: React, Next.js, React Native, TailwindCSS, WebSockets, User Workflow Design
Backend & Data: Flask, FastAPI, Node.js, Express.js, PostgreSQL, MySQL, SQL Server, Azure SQL, Firebase
Engineering: Microservices, Async Processing, CI/CD, Docker, Jenkins, AWS, Distributed Systems, Analytics

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, WebSockets*
- Built a high-volume product platform for **50K+ users** and **1M+ transactions**, shipping real-time updates, secure payment flows, and incentive-aligned user experiences in a transaction-heavy environment.

Big-Brain Live | *PostgreSQL, React-adjacent UI, REST APIs*
- Built an AI-powered SaaS workspace for **200+ users** with secure uploads, collaborative workflows, and retrieval over **50K+ documents**, reducing document review time by **60%**.

Chat2SQL GitHub | *TypeScript, PostgreSQL, Docker*
- Built a developer-facing SQL workspace supporting **10+** databases, enabling schema exploration, structured query execution, and faster decision-making across a Java and TypeScript codebase.
