Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years of experience building consumer-facing mobile and full-stack products, shipping real-time workflows, tested APIs, and scalable app features across **Android-adjacent** and web stacks. Strong in **Kotlin/Java concepts**, **React Native**, **TypeScript**, **REST APIs**, **OOP**, and architecture patterns for high-usage user experiences.

Education

University of Southern California **Los Angeles, CA**
Master of Science in Computer Science *August 2024 – May 2026*
GPA: 3.75/4 Coursework: Analysis of Algorithms, Web Technologies, Database Systems

Pandit Deendayal Energy University **Gandhinagar, In**
Bachelor of Technology in Computer Science and Engineering *November 2020 – May 2*
GPA: 3.88/4 Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Architected a multi-tenant platform across **Azure SQL**, **PostgreSQL**, and cloud storage for 500+ users, reducing dashboard latency from **1.2s to 350ms** through schema, query, and indexing optimization.
- Built reliable **FastAPI** backend workflows and failure-isolated job execution for 5K+ monthly tasks, improving responsiveness for user-facing views while maintaining **99%+ production reliability**.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Developed a **Flask + React** grading platform with instructor-facing dashboards, modular workflows, and secure file-ingestion paths, supporting **10K+ submissions** and 150+ instructors at production scale.
- Implemented concurrent processing, REST integrations, and **GitHub Actions CI/CD**, sustaining **10K+ requests/day** while reducing grading turnaround time by **60%**.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform software with microservice architecture, **OOP design patterns**, and **20+ unit/integration tests** using Jenkins, PyTest, and Mockito across **3 operating systems** in an Agile Scrum environment.
- Optimized API and ETL components for low-bandwidth usage with AWS Glue and S3, improving response time by **30%** and pipeline efficiency by **68%** while collaborating with Microsoft and GitHub stakeholders.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a user-facing **MERN** platform with **REST APIs**, **WebSockets**, and microservices, supporting 8+ workflows, role-based access, notifications, and **2M+ synchronized records**.
- Automated deployments and test flows with **Jenkins**, Docker, and Azure SQL-backed services, reducing deployment time by **50%** and reaching **95%+ build validation** across release runs.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built a cross-platform service-booking application using **React Native**, **React**, **TypeScript**, and Flask APIs, supporting reservation flows, payment status tracking, and real-time synchronization across **50K+ booking records**.
- Designed booking, authentication, and payment workflows with webhooks and Firebase-backed updates, improving confirmation speed by **40%**, reducing manual payment handling by **70%**, and boosting cross-platform compatibility by **15%**.

Skills

Languages: Java, Kotlin, JavaScript/TypeScript, Python, C++, SQL
Mobile & UI: Android App Concepts, React Native, React.js, Material Design, MVC/MVVM, Repositories, Factories, HTML, CSS, TailwindCSS
Backend & APIs: REST APIs, Flask, FastAPI, Node.js, Express.js, WebSockets, JSON, Client-Server Architecture
Databases: PostgreSQL, MySQL, MongoDB, Azure SQL, Firebase, Appwrite
Cloud & Infrastructure: AWS (RDS, S3, Glue), Microsoft Azure, Docker, Kubernetes, Jenkins, GitHub Actions
Engineering Practices: OOP, Clean Architecture, Unit & Integration Testing, CI/CD, Agile, Debugging, Performance Optimization, System Design

Projects

FinNexus | *Next.js, TypeScript, Kubernetes, MongoDB, Plaid*
- Built a consumer fintech platform supporting **50K+ users** and **1M+ transactions** with secure bank linking, real-time synchronization, responsive UI flows, and production-style deployment workflows.

HMIS | *MERN, TypeScript, ABDM APIs, Twilio*
- Designed a workflow-heavy platform with structured schemas, API integrations, and OOP-based modules that supported **100+ daily appointments** and reduced record retrieval time by **2x**.

CPU-Scheduling Simulator | *C++, React.js, JavaScript*
- Implemented **6 scheduling algorithms** with interactive controls and live visualizations across **1K+ simulated process combinations**, strengthening architecture, debugging, and testable UI logic.
