# Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

## Summary

Solution-oriented software engineer with 2+ years delivering configuration-heavy web/data systems, client-facing workflow implementations, and reusable transformation pipelines with strong documentation and production support.

## Education

**University of Southern California, Los Angeles, CA** **August 2024 – May 2026**
*Master of Science in Computer Science* *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms

**Pandit Deendayal Energy University, Gandhinagar, India** **November 2020 – May 2024**
*Bachelor of Technology in Computer Science and Engineering* *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

## Experience

**USC Dornsife** **LA, California**
*Software Engineer* *September 2025 - Present*
- Designed configurable data-backed platform components across **Azure SQL/PostgreSQL** for 500+ users, improving dashboard response from 1.2s to 350ms via schema/query optimization.
- Implemented 5K+ monthly validation/release workflows with reconciliation and change tracking, improving data quality and post-deployment support readiness.

**Grad8** **LA, California**
*Software Engineer Intern* *June 2025 - August 2025*
- Translated business requirements into modular Flask + React workflows handling **10K+ daily requests**, including secure ingestion, configurable rubric flows, and instructor-facing UX paths.
- Partnered with product and engineering teams to troubleshoot defects and harden release quality via GitHub Actions CI/CD, reducing turnaround time by 60%.

**LST Capitals** **India**
*Web Developer Intern* *November 2022 - January 2023*
- Built client-facing booking/payment solutions with Flask APIs and Firebase-backed workflows for 50K+ records, including requirements mapping, system configuration, and integration support.
- Implemented and documented webhook-driven billing/refund automations, improving support response time and deployment confidence for partner onboarding.

**Aasma Technology Solutions** **India**
*Software Developer Engineer - (SecureSync)* *August 2023 - July 2024*
- Engineered data transformation and API workflows with OOP, AWS Glue, and S3, improving response times by 30% and pipeline efficiency by 68%.
- Delivered software configuration support and automated validation with Jenkins, PyTest, and Mockito across 3 OS environments for consistent release quality.

**Aasma Technology Solutions** **India**
*Full Stack Developer Intern - (VibrantChem)* *May 2023 - August 2023*
- Configured and delivered a MERN operations platform with REST APIs/WebSockets supporting 8+ workflows and 2M+ synchronized records for process-heavy teams.
- Created deployment/test runbooks with Jenkins and Docker, reducing deployment time by 50% and improving cross-team delivery consistency.

## Skills

**Languages**: Python, JavaScript/TypeScript, Java, SQL, C++
**Content & Markup**: HTML, CSS, XML/XSLT familiarity, structured content workflows, publishing-style configuration
**Backend & Data**: Flask, FastAPI, Node.js, REST APIs, JSON, PostgreSQL, MySQL, SQL Server, MongoDB, Azure SQL
**Transformation & Tooling**: AWS Glue/S3, Jenkins, GitHub Actions, Docker, Git, CI/CD, defect triage, process documentation
**Solution Engineering**: Requirements analysis, software demonstrations, workshop/training support, client communication, change management

## Projects

**Chat2SQL** Code | *Java, TypeScript, SQL, Maven, Docker*
- Built a configurable SQL workspace supporting 10+ databases with schema exploration, structured query validation, and reusable execution workflows for analyst teams.

**HMIS** Live | *MERN, ABDM APIs, Twilio*
- Designed structured healthcare workflows with API integrations and monitoring-backed operations supporting 100+ daily appointments and 2x faster retrieval.

**Big-Brain** Live | *LLaMA-2, FAISS, Pinecone, PostgreSQL*
- Implemented semantic retrieval over 50K+ documents with reusable indexing and summarization flows for content-heavy query and publishing scenarios.
