Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer with **2+ years of experience** shipping customer-facing products, scalable backend services, and data-driven feature improvements, with end-to-end ownership from requirements and technical design through launch, iteration, and maintenance.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Data Retrieval, Operating Systems

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Owned business-critical dashboard and backend flows for a **multi-tenant AI education platform** used by **500+ users**, reducing latency from **1.2s to 350ms** through schema, query, and API optimization.
- Took features from requirement refinement through production release across FastAPI, Azure SQL, PostgreSQL, and cloud storage, processing **1K+ AI jobs** and **5K+ monthly integrations** with **99%+ reliability**.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Built customer-facing **React** and Flask workflows for an AI grading product serving **150+ instructors**, handling **10K+ requests/day** across upload, rubric, and review flows.
- Implemented concurrent backend execution and stable APIs with AWS RDS and CI/CD, reducing feedback turnaround time by **60%** while maintaining performant user experiences under peak load.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a **MERN**-based resource management platform with **REST APIs**, WebSockets, and Azure SQL-backed services, synchronizing **2M+ records** across distributed product workflows.
- Used Google Analytics and experiment-driven iteration to improve user flows, reduce resource wastage by **42%**, and increase lead conversions by **15%** through data-informed product changes.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Developed and maintained cross-platform API and data-sharing modules, improving response times by **30%** while owning testing, validation, and deployment quality across Windows, Linux, and macOS.
- Partnered with Microsoft and GitHub stakeholders in Agile delivery, increasing pipeline efficiency by **68%** and reducing technical debt by **20%** through CI/CD and workflow improvements.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Designed and implemented booking, payment, and analytics flows for a cross-platform service marketplace, supporting **50K+ records** with core API latency below **200ms**.
- Improved booking confirmation speed by **40%** and reduced manual refund handling by **70%** through real-time Firebase updates, webhook automation, and data-backed iteration on key user flows.

Skills

Languages: JavaScript/TypeScript, Python, Go, SQL, Java, C++, HTML/CSS
Frontend & Product: React, Next.js, Server-Side Rendering, A/B Testing, Experiment Analysis, User Flow Optimization
Backend & Data: REST APIs, Flask, FastAPI, Node.js, PostgreSQL, MySQL, Azure SQL, MongoDB
Engineering: Docker, AWS, CI/CD, Git/GitHub, Jenkins, Performance Optimization, Scalable Systems

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a full-stack fintech platform for **50K+ users** and **1M+ transactions**, delivering real-time transaction flows, advanced filtering, and secure platform behavior under high-volume usage.

Big-Brain Live | *PostgreSQL, FAISS, GCP, React*
- Built a customer-facing document platform over **50K+ files** with semantic search, summarization, and responsive interaction flows, reducing document review time by **60%** for **200+ users**.

Chat2SQL Repo | *Java, TypeScript, Docker, SQL*
- Extended a full-stack SQL workspace supporting **10+ databases**, cross-platform deployment, and AI-assisted query workflows across Java, TypeScript, Docker, and schema-aware data tooling.
