Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Detail-oriented operations and quality-focused engineer with 2+ years of experience in **process verification**, **data accuracy**, **defect triage**, and **production workflow monitoring**, with strong discipline in SOP-style execution and escalation.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Executed **5K+ monthly process validations** with reconciliation checks and release controls, improving production reliability and reducing downstream exceptions in operational workflows.
- Improved data processing accuracy and throughput for a 500+ user platform by standardizing SQL workflow checks, issue logging, and corrective action follow-ups.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Maintained high-volume workflow quality across **10K+ daily requests** by validating ingestion pipelines, monitoring failures, and coordinating fixes with engineering peers.
- Built repeatable verification steps and CI/CD quality gates that reduced turnaround time by **60%** while preserving stable release behavior under peak load.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Owned **20+ unit/integration verification suites** and daily pipeline checks across 3 OS environments, improving process consistency and defect visibility.
- Triage-investigated API/ETL defects and escalated resolution paths, improving response times by **30%** and pipeline efficiency by **68%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Supported production workflow continuity for 8+ business processes and 2M+ synchronized records through structured checks, incident logs, and release validation routines.
- Reduced deployment cycle time by **50%** via standardized Jenkins/Docker procedures and clearer handoff documentation for operations teams.

LST Capitals **India**
Web Developer Intern *November 2022 - January 2023*
- Managed transactional workflow quality for 50K+ records by verifying end-to-end processing states and resolving mismatch exceptions through documented procedures.
- Implemented monitoring-backed webhook flows and status reporting, improving queue visibility and escalation response for delayed or failed jobs.

Skills

Quality & Process: **process verification**, production counts, FIFO workflow discipline, defect triage, escalation handling
Data & Tools: SQL, PostgreSQL, MySQL, SQL Server, MongoDB, Excel, digital reporting/checklists
Systems: workflow monitoring, log interpretation, exception handling, release validation, CI/CD checks
Technical: Python, JavaScript/TypeScript, Java, REST APIs, Jenkins, Docker, Git
Behavioral: strong attention to detail, adaptability, multi-tasking, clear communication, independent execution

Projects

HMIS Live | *MERN, ABDM APIs, Twilio*
- Built structured healthcare process workflows with monitoring-backed controls supporting **100+ daily appointments** and **2x faster** record retrieval.

FinNexus Live | *Next.js, TypeScript, MongoDB*
- Implemented high-volume process tracking for **1M+ transactions** with status validation, exception handling, and reliable operational reporting.

CPU-Scheduling Simulator Live | *C++, React.js, JavaScript*
- Created deterministic process-priority simulations across **1K+ combinations**, strengthening queue reasoning, count validation, and workflow optimization skills.
