Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Technology engineer with **2+ years of experience** supporting reliable systems, troubleshooting production issues, maintaining cloud-backed services, and improving operational procedures across internal and customer-facing platforms.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*

- Maintained data-backed platform services across **Azure SQL, PostgreSQL, and SQL Server** supporting **500+ users**, reducing dashboard latency by **71%** (**1.2s to 350ms**) through query tuning and infrastructure-aware optimization.
- Supported reliable job execution with **FastAPI**, background workflows, and cloud storage integrations, processing **5K+ monthly jobs** with **99%+** reliability through validation, monitoring, and incident-style troubleshooting.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*

- Supported production backend operations for a platform serving **150+ instructors** and **10K+ requests/day** using **Flask, MySQL, AWS RDS, and REST APIs**, maintaining stable response behavior during peak usage.
- Built and maintained secure file-ingestion and batch-processing workflows for **1K+** files per run, reducing turnaround time by **60%** while improving issue visibility and operational consistency.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Managed cross-platform validation environments across **Windows, Linux, and macOS** with **20+** automated unit/integration test suites using **Jenkins, PyTest, and Mockito**, supporting nightly build and regression workflows.
- Troubleshot API, ETL, and storage issues using **AWS Glue, S3, SQL, and OOP patterns**, improving response times by **30%**, pipeline efficiency by **68%**, and reducing technical debt by **20%**.

Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Supported a **MERN**-based operational platform with **Azure SQL**, **Jenkins**, and Docker, helping maintain workflows across **8** business services and **2M+ records** with high release reliability.
- Used **Sentry, Azure Monitor, and Kibana** to improve error visibility and deployment confidence, while automated testing workflows raised successful build validation to **95%+**.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Supported cross-platform booking and payment services with **Flask**, Firebase, and real-time sync for **50K+ records**, sustaining sub-**200ms** API performance and **40%** faster booking confirmation.
- Maintained webhook-driven operational workflows and analytics with **Databricks** and Spark, reducing manual refund handling by **70%** and improving internal issue visibility through hourly reporting.

Skills

Systems & Platforms: Windows, Linux, Azure SQL, AWS (EC2, S3, RDS, Glue), Firebase, Office-style productivity environments
Support & Operations: Monitoring, Troubleshooting, Incident Response, Change Management, Documentation, SOPs, Knowledge Sharing
Tools: Jenkins, Docker, Sentry, Azure Monitor, Kibana, GitHub Actions, VM-based Testing
Technical: Python, Java, SQL, REST APIs, Networking/Security Fundamentals, Hardware/Software Issue Resolution

Projects

Linguistix | *Python, AWS, Docker, CI/CD*

- Deployed a containerized data processing API on **AWS CodePipeline and ECS/Fargate**, achieving **87%** accuracy with automated releases, validation checks, and production-grade reliability.

Chat2SQL GitHub | *Java, TypeScript, Docker*

- Built a cross-platform database workspace supporting **10+** databases across Windows, macOS, and Linux, with structured query tooling, local deployment workflows, and maintainable technical documentation.

HMIS – Hospital Management Information System Live | *Sentry, Twilio, TypeScript*

- Built an operational healthcare workflow platform supporting **100+ daily appointments**, using **Sentry** monitoring, automated alerts, and structured access flows to reduce administrative workload by **30%**.
