Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Associate-level software engineer with 2+ years building and maintaining **application features**, **testing/debugging workflows**, and **SDLC-aligned releases** across full-stack systems in collaborative Agile engineering environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*

- Developed and maintained **backend application workflows** for 5K+ monthly jobs, implementing validation logic, defect fixes, and release safeguards that improved stability and supported reliable on-time feature deployments.
- Improved application performance and debugging efficiency by optimizing SQL/database interactions, reducing latency from **1.2s to 350ms** while documenting technical changes for cross-team knowledge sharing and support readiness.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*

- Built **React + Flask software features** handling 10K+ daily requests, translating business requirements into tested APIs and UI components while collaborating closely with engineering and product stakeholders.
- Supported code quality through CI/CD checks, debugging, and release validation, reducing turnaround time by **60%** while preserving consistent customer-facing behavior across frequent development cycles.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*

- Designed and implemented **application integration workflows** using Python/Java, AWS Glue, and S3, improving response times by **30%** while supporting scalable, maintainable software operations across environments.
- Maintained **20+ unit/integration test suites** with Jenkins, PyTest, and Mockito, increasing CI efficiency by **68%** and reducing technical debt by **20%** through continuous testing and process improvements.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 - May 2025*

- Created Python-based analytical pipelines over 100K+ trajectories to evaluate behavior and identify issues, producing actionable reports that helped teams prioritize technical fixes and implementation decisions.
- Prepared clear technical documentation and summaries for multidisciplinary collaborators, improving communication quality and supporting smoother handoffs between research, engineering, and operational stakeholders.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*

- Implemented REST/WebSocket modules supporting 2M+ synchronized records and eight workflows, enhancing software reliability and responsiveness for customer-facing processes in an iterative development environment.
- Automated Docker/Jenkins deployment and validation workflows, reducing release time by **50%** while improving traceability, consistency, and operational confidence for recurring software delivery tasks.

Skills

Application Development: Python, Java, JavaScript/TypeScript, React.js, Flask, FastAPI
Testing & Debugging: unit/integration testing, defect triage, release validation, CI/CD checks
Data & Platforms: SQL, PostgreSQL, MySQL, AWS (S3/Glue), Azure SQL, Docker
Engineering Practices: SDLC, code reviews, technical documentation, Agile/Scrum collaboration, Git/Jenkins

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*

- Built a full-stack application supporting 50K+ users and 1M+ transactions, implementing secure workflows, scalable integrations, and production-ready deployment practices for reliable customer-facing financial operations.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Developed a schema-aware SQL workspace for 10+ databases with validated query generation and structured outputs, improving analysis productivity and reducing debugging effort during routine data management tasks.

Linguistix | *Python, FastAPI, AWS ECS/Fargate, CodePipeline*

- Implemented a containerized API with automated quality checks and versioned CI/CD controls, achieving **87%** processing accuracy while strengthening release consistency and operational maintainability in cloud environments.
