Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Entry-level software engineer with 2+ years building **Java/TypeScript full-stack features**, **SQL-backed APIs**, and **automated testing workflows** across Agile teams focused on reliable production delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Designed and implemented backend features supporting 5K+ monthly jobs, writing SQL-integrated FastAPI services with validation and error handling to maintain stable production behavior across business-critical workflows.
- Optimized database queries and service boundaries to reduce latency from **1.2s to 350ms** for 500+ users, while documenting design decisions and participating in cross-team technical reviews.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Built **React + Flask full-stack components** handling 10K+ daily requests, implementing APIs, UI modules, and automated checks while collaborating with peers to deliver tested functionality in Agile sprints.
- Improved release quality via CI/CD checks and defect debugging, reducing turnaround time by **60%** while preserving usability and reliability for customer-facing workflows in rapid iteration cycles.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Developed and maintained **Java/Python integration services** with AWS Glue and S3, improving response times by **30%** while supporting scalable data flows and reliable application behavior in production.
- Created and maintained **20+ unit/integration suites** with Jenkins, PyTest, and Mockito, increasing CI efficiency by **68%** and reducing technical debt by **20%** through continuous quality controls.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Implemented REST/WebSocket modules supporting eight workflows and 2M+ synchronized records, improving application responsiveness and reliability across user-facing operational flows and backend synchronization paths.
- Automated Docker/Jenkins deployment and verification steps, reducing release time by **50%** and increasing repeatability of software updates, fixes, and maintenance tasks for distributed team delivery.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 - May 2025*
- Built Python analysis pipelines over 100K+ trajectories with reproducible outputs, strengthening debugging quality and helping teams evaluate model behavior using clear metrics and technical summaries.
- Presented findings to technical and non-technical stakeholders, improving communication and supporting data-driven decisions on implementation priorities, risk mitigation, and iterative feature refinement strategies.

Skills

Languages: **Java**, **JavaScript/TypeScript**, **Python**, SQL, C++
Full Stack: React.js, Flask, FastAPI, REST APIs, web UI development, backend service design
Testing & Delivery: unit/integration testing, CI/CD, code reviews, debugging, release verification
Cloud & Platform: Docker, Kubernetes, Azure SQL, AWS (S3/Glue/RDS), Git, Jenkins, Agile/Scrum

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a full-stack financial workflow platform supporting 50K+ users and 1M+ transactions, implementing secure APIs and robust data operations with scalable deployment and reliable production behavior.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Developed a schema-aware SQL workspace for 10+ databases with validated query generation and structured execution outputs, improving analysis productivity and reducing debugging effort for complex relational workflows.

Linguistix | *Python, FastAPI, AWS ECS/Fargate, CodePipeline*
- Implemented a containerized API with automated validation and CI/CD release controls, achieving **87%** processing accuracy while improving deployment consistency and maintainability for cloud-based application workflows.
