Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer pursuing an M.S. in Computer Science at USC with 2+ years of experience building **Python/C++ script automation**, **Linux/UNIX validation workflows**, and reliable **hardware/software integration** systems for mission-critical environments.

Education

University of Southern California **Los Angeles, CA**
Master of Science in Computer Science *August 2024 – May 2026*
GPA: 3.75/4 Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University **Gandhinagar, India**
B.Tech. in Computer Science and Engineering *November 2020 – May 2024*
GPA: 3.88/4 Coursework: OOP, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*

- Built **Python** workflow services and data interfaces for **500+ users**, reducing latency from **1.2s to 350ms** through query optimization while improving script reliability and backend observability across **Linux**-based services.
- Implemented fault-tolerant orchestration for **5K+ monthly jobs** using validation safeguards and rollback checks, improving **production reliability** and accelerating troubleshooting across distributed services and cross-functional engineering teams.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React** and **Flask** features handling **10K+ daily requests**, translating requirements into reusable APIs and components while improving deployment traceability and repeatable validation coverage in staging and production.
- Improved release velocity with **CI/CD** controls and concurrent processing, reducing turnaround time by **60%** while maintaining quality through automated checks, defect triage, and close collaboration with product stakeholders.

USC AI Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Built **Python** experimentation pipelines over **100K+ trajectory logs**, enabling rigorous behavior evaluation and reproducible benchmark execution across unstructured, safety-sensitive scenarios requiring disciplined testing workflows.
- Produced debugging diagnostics and technical summaries that translated experimental findings into implementation plans, improving **defect isolation speed** and strengthening collaboration between research, systems, and software engineering teams.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **API** and **ETL** microservice workflows with OOP, AWS Glue, and S3, improving response times by **30%** while supporting scalable integrations and dependable data exchange across enterprise systems.
- Maintained **20+** unit and integration suites using Jenkins, PyTest, and Mockito across **Linux/Windows** environments, boosting pipeline efficiency by **68%** and reducing technical debt by **20%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **REST API** and **WebSocket** modules supporting eight workflows and **2M+ synchronized records**, improving extensibility and reliability while coordinating integration constraints with operational teams.
- Automated deployments and testing with **Docker** and **Jenkins**, reducing deployment time by **50%** and improving release consistency through script-driven checks, reproducible environments, and rollback mechanisms.

Skills

Languages: Python, C++, Java, JavaScript, TypeScript, SQL, Bash
Backend & APIs: Flask, FastAPI, REST APIs, Microservices, ETL Pipelines
Cloud & Infrastructure: AWS (S3, Glue, ECS), Azure, Docker, Kubernetes, Linux/UNIX
Testing & Integration: Script Testing, Unit/Integration Testing, Hardware/Software Integration, Troubleshooting
Engineering Practices: Git, Jenkins, GitHub Actions, CI/CD, Agile/Scrum

Projects

Linguistix | *Python, AWS, Docker, CI/CD*

- Developed and deployed a containerized **RESTful API** on AWS CodePipeline and ECS/Fargate with automated **CI/CD** and validation checks, achieving **87% accuracy** and production-grade reliability under sustained workloads.

FinNexus | *Next.js, TypeScript, Kubernetes, MongoDB, Plaid*

- Built a scalable fintech platform supporting **50K+ users** and **1M+ transactions** with secure integrations, real-time updates, and Kubernetes-backed deployment workflows focused on reliability, observability, and data integrity controls.

CPU Scheduling Simulator | *C++, React.js, JavaScript*

- Implemented FCFS, SJF, SRT, RR, and MLQ scheduling algorithms with visualization and metrics tooling, reducing debugging time by **20%** while strengthening low-level **C++** reasoning and performance analysis skills.
