Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Customer-facing solutions engineer with 2+ years driving **technical pilots**, **data-backed ROI validation**, and **cross-functional product rollouts** across software, hardware-adjacent systems, and cloud-enabled operational workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Owned pilot-like rollout readiness for backend workflows handling 5K+ monthly jobs, defining validation checks and technical acceptance criteria that improved production reliability and reduced deployment-risk for stakeholder-facing releases.
- Built data interfaces for 500+ users and reduced latency from **1.2s to 350ms**, using SQL performance analysis to surface measurable value and operational impact for technical and non-technical collaborators.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Coordinated product and engineering teams to ship React/Flask workflows supporting 10K+ daily requests, translating customer-style requirements into tested functionality, training-ready UX patterns, and robust implementation plans.
- Improved release velocity by **60%** using CI/CD and validation automation, enabling faster iteration and clearer proof-of-value feedback loops during high-frequency product refinement cycles.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Engineered API and ETL integrations with AWS Glue/S3, improving response times by **30%** while collaborating with external stakeholders and service providers to maintain stability across distributed deployment environments.
- Established 20+ automated test suites with Jenkins, PyTest, and Mockito, increasing pipeline efficiency by **68%** and improving confidence in release readiness for broader portfolio-style customer usage.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Delivered REST/WebSocket modules supporting eight workflows and 2M+ synchronized records, improving operational consistency and supporting customer enablement through clear, maintainable product interactions and service behavior.
- Automated Docker/Jenkins deployment and maintenance workflows, reducing release time by **50%** and streamlining recurring onboarding, troubleshooting, and support processes for technical teams.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 - May 2025*
- Built Python analytics pipelines over 100K+ trajectories and generated stakeholder-ready summaries, helping teams quickly interpret quality signals, prioritize remediation, and align technical plans with project-level outcomes.
- Worked cross-functionally with researchers and engineers to operationalize findings, improving communication between technical contributors and decision-makers during iterative experiment-to-deployment transition phases.

Skills

Customer & Solutions: pilot success criteria, technical training, customer onboarding, proof-of-value/ROI communication
Software: Python, Java, TypeScript/JavaScript, React.js, Flask, FastAPI, REST APIs
Data & Reporting: SQL, data collection/analysis, metadata-aware workflows, dashboard-oriented validation
Operations: CI/CD, Jenkins, Docker, AWS (S3/Glue), cross-functional execution, technical documentation

Projects

Linguistix | *Python, FastAPI, AWS ECS/Fargate, CodePipeline*
- Implemented a containerized API with automated validation and cloud release controls, achieving **87%** processing accuracy while demonstrating scalable operational value through consistent deployment and measurable quality outcomes.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a full-stack platform supporting 50K+ users and 1M+ transactions, using secure integrations and real-time workflows to showcase measurable business value and expansion-ready product architecture.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Developed a schema-aware SQL workspace for 10+ databases with structured query validation, enabling technical users to rapidly evaluate outcomes and communicate insights to broader business stakeholders.
