Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Java developer with 2+ years building **Java web services**, **MVC-based frontends**, and **SQL-driven business workflows** with strong testing discipline, release ownership, and iterative delivery in Agile teams.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*

- Developed **Java/Python backend services** and data interfaces for 500+ users, reducing request latency from **1.2s to 350ms** through query optimization and performance tuning.
- Implemented **self-validated workflow orchestration** for 5K+ monthly jobs with controlled release safeguards, improving delivery quality and reducing post-release rework.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*

- Built **MVC-style web features** for 10K+ daily requests using JavaScript/HTML/CSS and backend APIs, translating requirement documents into maintainable transaction-ready screens.
- Improved **pre-QA test automation** and CI/CD checks, reducing release turnaround by **60%** while maintaining functionality across concurrent feature updates.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 - May 2025*

- Built **reporting and analysis pipelines** over 100K+ trajectory logs, creating structured outputs and technical documentation to support data-driven project decisions.
- Produced **debugging diagnostics** that accelerated issue triage and enabled faster implementation cycles with clear communication to cross-functional stakeholders.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*

- Engineered **API and ETL services** with Java/Python and AWS tools, improving response time by **30%** while supporting multi-system data exchanges.
- Maintained **20+ automated unit/integration suites** with Jenkins, PyTest, and Mockito, improving pipeline efficiency by **68%** and reducing regression defects.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*

- Developed **transaction-focused MERN modules** supporting eight workflows and 2M+ synchronized records, improving reliability of concurrent create/update operations.
- Automated **deployment/test workflows** with Docker and Jenkins, cutting release time by **50%** and improving consistency across staging and production.

Skills

Languages: **Java**, **SQL/TSQL**, JavaScript, HTML5, CSS3, Python
Backend: Java web services, REST APIs, transaction workflows, input validation, business logic layering
Frontend: MVC patterns, responsive UI screens, form-driven record create/update, usability-focused design
Data & Tools: multi-table joins, relational schema concepts, IntelliJ, Git, Azure DevOps, Jenkins, CI/CD
Engineering: requirement interpretation, self-testing before QA handoff, documentation, sprint-based delivery

Projects

Case Workflow Management Portal | *Java, Spring Boot, SQL Server, JavaScript*

- Built a **full-stack case management portal** with multi-step transaction screens and multi-table SQL joins, improving workflow accuracy and reporting speed for operations teams.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Designed a **schema-aware SQL assistant** across 10+ datasets with query validation and explainable outputs, reducing manual debugging effort in analyst reporting tasks.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*

- Developed a **production-grade web platform** serving 50K+ users and 1M+ transactions, emphasizing secure APIs, maintainable UI architecture, and scalable deployment practices.
