Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Frontend software engineer with 2+ years building **TypeScript/JavaScript platforms, React interfaces, and reusable UI systems**; experienced in component architecture, responsive design, performance, API integration, testing, documentation, automation, and financial applications.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Developed **data-driven dashboard experiences and reusable API interfaces** supporting 500+ users across interactive workflows, FastAPI, PostgreSQL, and SQL Server while reducing application latency from 1.2 seconds to 350 milliseconds.
- Improved client experience and rendering responsiveness through indexed data access, incremental loading, explicit application states, and fault isolation, sustaining 99%+ reliability across 5,000+ monthly production workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built **React dashboard components and application flows** for uploads, grading history, question management, and feedback, serving 150+ users and 10,000+ daily requests through consistent REST interfaces.
- Structured reusable frontend-backend patterns across React and modular Flask Blueprints, testing UI and API behavior while incorporating design-review feedback and reducing feature turnaround time 60% through automation.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **framework-neutral service interfaces and reusable modules** using OOP design patterns, REST APIs, caching, and SQL, improving response times 30% and reducing technical debt 20% across platforms.
- Improved developer experience through cross-platform build automation, 20+ unit and integration tests, documentation, Git, Jenkins, and CI/CD while collaborating with Microsoft and GitHub engineers through code reviews.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **React and Node.js component-driven interfaces** across eight services for authentication, records, billing, permissions, and notifications, maintaining consistent user experiences while synchronizing 2M+ records through APIs and WebSockets.
- Partnered with product stakeholders to improve scalable UI performance and consistency using reusable patterns, analytics, automated tests, and monitoring, reducing resource waste 42% and deployment time 50%.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed **responsive React Native, React, and TypeScript interfaces** for booking, pricing, payments, refunds, and status workflows across mobile and web, supporting 50,000+ records with sub-200-millisecond responses.
- Translated customer requirements into reusable UI and API patterns across 12+ integrations, implementing authentication, validation, real-time updates, and responsive production workflows while reducing manual refund handling 70%.

Skills

Languages: TypeScript, JavaScript, HTML5, CSS3, Java, Python, SQL
Frameworks: React.js, Next.js, Angular.js, React Native, Material UI, TailwindCSS, Bootstrap, Node.js
UI Engineering: Component architecture, reusable interfaces, responsive design, application state, API design, consistency
Developer Experience: Build tooling, testing infrastructure, documentation, automation, Git, code reviews, CI/CD
Quality: Jest, Selenium, PyTest, unit/integration testing, performance optimization, maintainability, web fundamentals

Projects

FinNexus Live | *Next.js, TypeScript, Financial Data*

- Built a **responsive financial application** supporting 50,000+ users and 1M+ transactions with reusable Next.js and TypeScript interfaces, real-time updates, advanced filtering, MongoDB persistence, and secure bank integrations.

PiXMod Live | *Next.js, Angular.js, Responsive UI*

- Developed a **cross-framework image application** with responsive Next.js and Angular.js interfaces for segmentation, recoloring, restoration, search, and subscriptions, processing 1,000+ edited assets with scalable MongoDB metadata storage.

Chat2SQL Code | *TypeScript, Java, Developer Tooling*

- Extended an **open-source developer platform** across TypeScript and Java modules, supporting 10+ databases with reusable interfaces, schema exploration, compatibility checks, Docker, Maven, Node.js, and cross-platform build workflows.
