Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

UI-focused software engineer with 2+ years delivering **high-performing web and mobile applications** using React, TypeScript, JavaScript, Node.js, HTML, CSS, Less, PostgreSQL, REST APIs, testing, and CI/CD.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*

- Improved enterprise dashboard performance for 500+ users, reducing latency from 1.2 seconds to 350 milliseconds through application and data analysis, PostgreSQL query optimization, indexing, debugging, and iterative usability improvements.
- Integrated user-facing workflows with FastAPI services, PostgreSQL, and cloud storage, processing 5,000+ monthly jobs with validation, error handling, CI/CD releases, monitoring, and 99%+ production reliability at scale.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*

- Built responsive React interfaces for file upload, grading history, and question management, integrating REST APIs while serving 150+ users and 10,000+ daily requests with stable performance at scale.
- Developed asynchronous batch workflows without blocking the UI, processing 1,000+ files per batch while adding dynamic model switching, fallback behavior, diagnostic logging, and user feedback displays at scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed and debugged cross-platform application features across Windows, macOS, and Linux, improving user experience for low-bandwidth customers by reducing API response times 30% and payload sizes 25%.
- Expanded automated test coverage with 20+ unit and integration suites using PyTest and Mockito, supporting Git-based Agile releases, nightly Jenkins builds, and reliable deployment across distributed teams.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Designed scalable React, TypeScript, and Node.js interfaces backed by REST APIs and WebSockets, reliably synchronizing two million records with 33% fewer conflicts across eight customizable business services.
- Added Jest, Mocha, and Selenium coverage across unit, integration, and end-to-end workflows, achieving 95%+ build validation while reducing code-review turnaround 25% and deployment time 50% across releases.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built responsive React Native and TypeScript experiences across mobile and web, integrating Flask REST APIs and Firebase updates for 50,000+ booking records with sub-200-millisecond responses at scale.
- Translated client requirements into 12+ frontend-backend integration points for booking, pricing, discounts, and payments, reducing design errors 25% while improving cross-platform compatibility 15% and overall delivery 22%.

Skills

Frontend: React, TypeScript, JavaScript, ES6, HTML, CSS3, Less, TailwindCSS, responsive UI
Applications: Node.js, Express.js, Next.js, React Native, REST APIs, WebSockets, PostgreSQL
JavaScript: Asynchronous programming, closures, types, component design, state management, debugging
Testing: Jest, Mocha, Selenium, PyTest, unit testing, integration testing, end-to-end testing
Engineering: Git, CI/CD, Jenkins, GitHub Actions, Agile/Scrum, algorithms, data structures, Linux

Projects

PiXMod Live | *Responsive UI, JavaScript, CSS*

- Built a responsive Next.js interface for customizable AI image workflows, integrating CLIP, SAM, Stable Diffusion, MongoDB, semantic search, and Stripe while reliably processing 1,000+ edited assets at scale.

Chat2SQL Code | *TypeScript, Less, Component Integration*

- Developed TypeScript frontend modules with HTML and Less for a database GUI supporting 10+ platforms, reliably integrating Java services, schema synchronization, query workflows, and cross-platform Docker deployment.

FinNexus Live | *Scalable Web Application, Testing*

- Delivered a scalable Next.js and TypeScript interface supporting 50,000+ users and one million transactions with real-time WebSocket updates, advanced filtering, secure APIs, and responsive TailwindCSS components at scale.
