Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **high-volume Java/Python applications, SQL systems, and ETL pipelines**; experienced in AWS, multithreading, data integration, testing, production readiness, technical documentation, and AI-assisted development.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Developed **high-volume Python and SQL applications** across FastAPI, PostgreSQL, SQL Server, and cloud storage, supporting 500+ users while reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Built metadata-driven ETL workflows processing 5,000+ recurring monthly jobs with incremental loads, reconciliation, error handling, and CI/CD releases, sustaining 99%+ reliability while reducing data-integration latency 35%.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **Python APIs and responsive data-driven React interfaces** for uploads, processing, history, and reporting, serving 150+ users and 10,000+ daily requests with stable high-volume production performance.
- Integrated OpenAI, Claude, and Qwen behind adaptable services while owning implementation, testing, debugging, code review, AWS deployment, monitoring, and support, reducing feedback turnaround 60% through workflow automation.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built **scalable Java and Python data-integration services** using REST APIs, SQL, caching, AWS Glue, and S3, improving response times 30%, ETL efficiency 68%, and maintainability across platforms.
- Collaborated with Microsoft and GitHub engineers through Agile ceremonies, technical discussions, and code reviews while maintaining 20+ tests, Jira work items, Jenkins pipelines, documentation, and production reports.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **reusable JavaScript application components** across eight services for authentication, customer records, billing, permissions, analytics, and notifications, securely synchronizing 2M+ records through REST APIs and Azure SQL.
- Improved production readiness through Docker, Jenkins, automated tests, and monitoring with Sentry, Azure Monitor, and Kibana, achieving 95%+ build validation while reducing deployment time 50% across releases.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed **high-volume production data pipelines and applications** using Python, Firebase, Databricks, and Spark, supporting 50,000+ transaction records with real-time synchronization and sub-200-millisecond API responses across platforms.
- Clarified detailed business rules with customers and documented 12+ process flows, implementing payment integrations, validation, and operational reports while reducing manual refund handling 70% through automated webhooks.

Skills

Languages: Java, Python, C++, JavaScript, TypeScript, SQL, Bash, Unix shell
Data: ETL tools, data integration, PostgreSQL, SQL Server, MySQL, Oracle, MongoDB, Databricks, Spark, metadata-driven applications
Cloud: AWS EC2, ECS, RDS, S3, Docker, Kubernetes, cloud-native applications, deployment, monitoring, CI/CD
Engineering: OOP, design principles, multithreading, parallel processing, REST APIs, web services, build automation, test automation
Workflow: Git, Jira, Jenkins, GitHub Actions, Cursor, prompt engineering, AI collaboration, code reviews, technical specifications, Agile

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Enhanced a **metadata-driven database application** across Java and TypeScript modules, supporting 10+ relational and NoSQL systems with schema exploration, query generation, validation, Docker, Maven, and Linux workflows.

Big-Brain Live | *PostgreSQL, GCP, REST APIs*

- Engineered a **cloud data-ingestion and indexing platform** processing 50,000+ records with incremental updates, PostgreSQL metadata, validation, REST APIs, semantic analytics, and performance tuning, reducing retrieval latency 40%.

Trend Tracker Live | *React.js, AWS EC2, Analytics*

- Developed a **data-driven marketing application** with reusable responsive React components, AWS EC2 deployment, and personalized recommendations, improving model accuracy from 78% to 92% while serving 3M+ users.
