Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Design-focused frontend engineer with 2+ years shipping polished **React**, **Next.js**, and **TypeScript** experiences. Skilled in responsive layouts, component architecture, design-to-code workflows, visual hierarchy, rapid prototyping, and production delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Software Engineering, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, OOP, Software Engineering, Data Structures and Algorithms

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built responsive **React** interfaces and data-rich dashboards for 500+ users, refining information hierarchy, loading states, and interaction flows while reducing perceived response latency from 1.2 seconds to 350 milliseconds.
- Partnered across product and engineering workflows to translate complex requirements into reusable interface patterns, validated user states, clear feedback behaviors, and production-ready experiences supporting concurrent platform activity.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Designed and shipped **React** workflows for file upload, question management, grading history, and status feedback, supporting 150+ instructors and 10,000+ daily requests through responsive production interfaces consistently.
- Improved high-volume user journeys with progress indicators, validation feedback, recovery states, and accessible controls for 1,000+ file batches, reducing turnaround 60% while preserving clarity during complex processing.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Delivered cross-platform product improvements across Windows, Linux, and macOS, collaborating through iterative reviews and maintaining 20+ automated validation suites to protect interface behavior and production release quality.
- Refined API payloads, pagination, caching, and user-facing data flows for constrained connections, improving response times 30% while reducing technical debt 20% through reusable, maintainable object-oriented implementation patterns.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed reusable **React** and TypeScript interfaces across eight product modules, integrating WebSockets and REST APIs to present more than two million synchronized records through responsive real-time workflows.
- Strengthened design-to-deploy delivery using component reviews, automated UI testing, Sentry, Docker, and Jenkins, cutting release time 50% while improving visual consistency, reliability, and production feedback across staged environments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Translated **Figma** concepts into React Native and web experiences spanning booking, payment, pricing, and status workflows, mapping 12+ integration points before presenting the interaction model to stakeholders.
- Built responsive cross-platform interfaces with React, TypeScript, Flask, and Firebase, supporting 50,000+ records and sub-200-millisecond interactions through real-time synchronization while improving mobile and web compatibility by 15%.

Skills

Design & Prototyping: Figma, visual hierarchy, typography, spacing, layout, grid systems, responsive design, high-fidelity prototyping, design-to-code workflows
Frontend: React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Material UI, component architecture, state management, responsive interfaces
Product Engineering: Node.js, Flask, REST APIs, WebSockets, Firebase, MongoDB, authentication, payments, real-time updates, cross-platform development
Quality & Delivery: Git, Jest, Mocha, Selenium, Sentry, Docker, Jenkins, GitHub Actions, CI/CD, accessibility, performance optimization, code reviews, Agile collaboration

Projects

PiXMod | Live | *Next.js, Tailwind CSS, Stripe, MongoDB*
- Designed and built a polished **Next.js** SaaS experience for AI image editing, combining responsive Tailwind layouts, subscription flows, visual previews, and scalable asset organization for 1,000+ edits.

FinNexus | Live | *Next.js, TypeScript, Tailwind CSS, WebSockets*
- Created a responsive fintech interface for 50,000+ users and one million transactions, integrating secure bank linking, real-time updates, advanced filtering, and clear information hierarchy across financial workflows.

Trend Tracker | Live | *React, Material UI, Responsive Commerce, AWS*
- Built a responsive React and Material UI commerce experience serving three million users, integrating visual recommendations and streamlined product discovery while improving recommendation accuracy from 78% to 92%.
