Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software developer experienced in **C#, Java, SQL Server, ASP.NET Core, and prompt-driven LLM workflows**, building, testing, and modernizing database-backed applications with Git, Azure DevOps, and CI/CD.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Designed SQL Server and PostgreSQL schemas for a multi-tenant platform supporting 500+ users, applying indexing, validation, and query tuning that reduced dashboard latency from 1.2 seconds to 350 milliseconds.
- Built ETL-style integration pipelines using FastAPI, SQL Server, and cloud storage, processing 5,000+ monthly jobs with reconciliation checks and CI/CD-backed releases, achieving 99%+ reliability at production scale.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Integrated OpenAI LLM APIs and prompt chains for rubric generation, grading, and feedback, adding documented fallbacks while reducing customer feedback turnaround time 60% reliably at production scale.
- Designed React dashboards and Python Flask backends serving 150+ instructors, processing 10,000+ daily requests with MySQL persistence, automated tests, and stable API performance end to end at scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered object-oriented Java and Python microservices with 20+ unit and integration tests, increasing pipeline efficiency 68% while reducing technical debt 20% across a large enterprise codebase at scale.
- Optimized SQL-backed API integrations using AWS Glue and S3, improving response times 30% for low-bandwidth users while collaborating in Agile sprints with Microsoft and GitHub stakeholders end to end.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed a React business platform with REST APIs and eight microservices, syncing two million records while reducing resource wastage 42% and increasing conversions 15% end to end.
- Collaborated with engineering and operations on Jenkins testing and production releases, cutting deployment time 50% while using Sentry to debug and refactor issues in Agile delivery at scale.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Analyzed client requirements, mapped 12+ integration points, and presented architecture recommendations before implementing Flask APIs and React booking and payment workflows for end users at production scale.
- Delivered database-backed Flask and Firebase solutions across 50,000+ records, validating implementation against specifications while achieving sub-200-millisecond responses and reducing manual refund handling 70% for customers at production scale.

Skills

Languages: C#, Java, Python, JavaScript, TypeScript, SQL
.NET & APIs: ASP.NET Core, Entity Framework Core, REST APIs, Flask, FastAPI, Node.js
Data: SQL Server, PostgreSQL, MySQL, MongoDB, Stored Procedures
AI: OpenAI API, LLM APIs, Prompt Engineering, NLP, LLM Systems
Delivery: Azure DevOps, Git, GitHub, Docker, Kubernetes, CI/CD, Jenkins, xUnit
Practices: OOP, Agile, Scrum, Debugging, Unit Testing, Integration Testing, JIRA

Projects

LedgerFlow | *C#, ASP.NET Core, SQL Server*
- Built a C# microservices transaction platform using ASP.NET Core Web API and Entity Framework Core, deploying containerized services to Azure Kubernetes Service with Azure DevOps CI/CD pipelines and xUnit test coverage.

Chat2SQL Code | *SQL Server, Relational Data*
- Built Java and TypeScript services supporting SQL Server, PostgreSQL, and MySQL, configuring Docker workflows with schema synchronization, validation, and reliable cross-platform integration end to end at production scale.

Big-Brain Live | *LLM Product, Documentation*
- Built a customer-facing AI document platform with PostgreSQL, LLaMA-2, and FAISS, enabling conversational search and summarization for 200+ users while reducing document-analysis time 60% with sub-second retrieval at scale.
