Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer with 2+ years building **enterprise applications, workflow automation, REST integrations, and SQL Server systems**; experienced translating business requirements into scalable solutions across Azure, React, Python, and CI/CD environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Partnered with business stakeholders to translate **operational requirements into scalable applications** across FastAPI, SQL Server, PostgreSQL, and cloud storage, supporting 500+ users while reducing dashboard latency 71%.
- Designed relational schemas, SQL queries, indexing, and validation across 10,000+ records, improving database latency 35% while sustaining 99%+ reliability across 5,000+ recurring enterprise production workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **responsive customer-facing React applications and Flask APIs** for uploads, processing, history, reporting, and feedback, serving 150+ users and 10,000+ daily requests with stable production performance.
- Translated user needs into maintainable workflow designs, technical specifications, and tested enhancements, owning features through analysis, implementation, code review, deployment, and support while reducing turnaround time 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **scalable enterprise microservices and middleware integrations** using Java, Python, REST APIs, SQL, caching, AWS Glue, and S3, improving response times 30%, pipeline efficiency 68%, and maintainability.
- Reviewed architecture and code with Microsoft and GitHub engineers while documenting detailed technical decisions and maintaining 20+ unit and integration tests through Jenkins, PyTest, Mockito, and Git.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **enterprise React, Node.js, and Azure SQL operational workflows** across eight services for authentication, records, billing, permissions, communications, and notifications, securely synchronizing 2M+ records across operating locations.
- Enhanced application usability, performance, and scalability through analytics, caching, Docker, automated testing, and production monitoring, reducing resource waste 42% and deployment time 50% while achieving 95%+ validation.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed **scalable hybrid web and mobile workflow applications** for booking, pricing, payments, refunds, and status reporting, supporting 50,000+ records through React, Flask, Firebase, and sub-200-millisecond APIs.
- Gathered customer requirements and documented 12+ system integrations, implementing secure payment webhooks, validation, and real-time synchronization while reducing manual refund handling 70% across mobile and web platforms.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML5, CSS3, Bash
Applications: React.js, Node.js, FastAPI, Flask, REST APIs, microservices, workflow automation, hybrid web applications
Data & Integration: SQL Server, Azure SQL, relational databases, SQL queries, schema design, indexing, systems integration, middleware integration
Cloud & Delivery: Microsoft Azure, AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, source management, deployment management
Engineering: Business requirements, technical specifications, system design, architecture diagrams, documentation, code reviews, testing, scalability, performance optimization

Projects

Chat2SQL Code | *Java, TypeScript, SQL Server, Docker*

- Enhanced an **enterprise database application** across Java and TypeScript modules, supporting SQL Server and 10+ systems with schema exploration, query generation, validation, Docker, Maven, and cross-platform workflows.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*

- Built a **scalable finance and payment application** supporting 50,000+ users and 1M+ transactions with secure bank integrations, real-time updates, advanced filtering, and Kubernetes-based CI/CD deployment automation.

HMIS Live | *TypeScript, REST APIs, Sentry*

- Built a **business-critical workflow application** with role-based access, customer dashboards, appointments, REST integrations, notifications, and monitoring, supporting 100+ daily workflows while reducing administrative workload 30% across operations.
