Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer with 2+ years building **React, Node.js, MongoDB, AWS, and AI-powered products**; owns features end-to-end across responsive interfaces, APIs, integrations, testing, performance, production support, and iterative delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **full-stack platform features and REST APIs** across FastAPI, PostgreSQL, SQL Server, and cloud storage, supporting 500+ users while reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Engineered fault-tolerant AI orchestration processing 1,000+ jobs with explicit states, data validation, and failure isolation, improving throughput 3x while sustaining 99%+ reliability across 5,000+ monthly production workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **responsive React product interfaces and Flask APIs** for uploads, dashboards, processing, history, and feedback, serving 150+ users and 10,000+ daily requests with stable peak-load performance.
- Integrated OpenAI, Anthropic Claude, and Qwen behind adaptable services, owning features through requirements, design, implementation, unit and integration testing, code review, deployment, production bug triage, and support.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built **distributed microservices and external API integrations** using OOP, SQL, caching, AWS Glue, and S3, improving response times 30%, pipeline efficiency 68%, and data consistency across platforms.
- Collaborated with Microsoft and GitHub engineers through design discussions, code reviews, and Agile sprints while maintaining 20+ unit and integration tests with PyTest, Mockito, Jenkins, and Git.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **secure React, Node.js, and MongoDB customer tools** across eight microservices for authentication, customer records, billing, permissions, and notifications, synchronizing 2M+ records through REST APIs and WebSockets.
- Improved overall user experience and performance using analytics, caching, automated tests, and observability with Sentry, Azure Monitor, and Kibana, reducing resource waste 42% and deployment time 50%.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Shipped **responsive React, TypeScript, and Flask features** for booking, pricing, payments, refunds, and status workflows, integrating Firebase and external services across 50,000+ records with sub-200-millisecond responses.
- Partnered with customers to clarify ambiguous requirements and design 12+ integrations, implementing secure authentication, data integrity validation, webhooks, and real-time synchronization while reducing manual production refund handling 70%.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS
Full Stack: React.js, Next.js, Node.js, Express.js, FastAPI, Flask, REST APIs, WebSockets, responsive UI
Data & Systems: MongoDB, PostgreSQL, MySQL, Firebase, data integrity, data structures, algorithms, concurrency, distributed systems
AI: OpenAI API, Anthropic Claude, LLMs, Transformers, FAISS, Pinecone, semantic search, AI-assisted development
Delivery: AWS, Docker, Kubernetes, Git, code reviews, CI/CD, Jest, PyTest, integration testing, monitoring, production support

Projects

Big-Brain Live | *React, PostgreSQL, LLMs, FAISS*

- Built an **AI-powered document product** processing 50,000+ records with authenticated uploads, collaborative React workflows, PostgreSQL metadata, LLM summarization, and FAISS semantic retrieval, reducing latency 40% and review time 60%.

FinNexus Live | *Next.js, TypeScript, MongoDB, Kubernetes*

- Shipped a **full-stack financial product** supporting 50,000+ users and 1M+ transactions with responsive interfaces, secure external integrations, real-time updates, MongoDB persistence, advanced filtering, and Kubernetes-based CI/CD automation.

Chat2SQL Code | *Java, TypeScript, Node.js, Docker*

- Extended an **open-source full-stack database application** across Java and TypeScript modules, supporting 10+ SQL and NoSQL systems with schema exploration, AI-assisted query generation, Docker, Maven, Node.js, and reusable interfaces.
