Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack developer with 2+ years building **React/JavaScript interfaces, Python APIs, relational databases, and AWS applications**; experienced in financial workflows, LLM integrations, automation, secure delivery, production support, and Agile collaboration.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **secure Python APIs and relational data services** across FastAPI, PostgreSQL, SQL Server, and cloud storage, supporting 500+ users while reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Automated 5,000+ monthly business workflows using validation, reconciliation, explicit states, and failure recovery, sustaining 99%+ reliability while improving asynchronous LLM processing throughput 3x across production environments.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **responsive intuitive React interfaces and Python APIs** for uploads, dashboards, processing, history, and feedback, serving 150+ users and 10,000+ daily requests with stable production performance.
- Integrated OpenAI, Anthropic Claude, and Qwen behind secure, adaptable services, owning features through design, implementation, testing, code review, AWS deployment, monitoring, and support while reducing turnaround 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **Python and Java integration services** using REST APIs, SQL, caching, AWS Glue, and S3, improving response times 30%, pipeline efficiency 68%, and data consistency across platforms.
- Collaborated with Microsoft and GitHub engineers through Agile ceremonies and code reviews while maintaining 20+ unit and integration tests, Git workflows, Jenkins pipelines, deployments, and technical documentation.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **customer-facing React and Node.js applications** across eight services for authentication, records, billing, permissions, and notifications, securely synchronizing 2M+ records through REST APIs, WebSockets, and Azure SQL.
- Improved application usability, security, performance, and scalability through analytics, caching, automated tests, and production observability, reducing resource waste 42% and deployment time 50% while achieving 95%+ validation.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed **secure responsive React, TypeScript, and Python financial workflows** for pricing, payments, refunds, and transaction status, supporting 50,000+ records through Firebase synchronization with sub-200-millisecond API responses.
- Gathered customer requirements and documented 12+ integrations, implementing secure multi-currency payments, authentication, validation, and webhooks while reducing manual refund handling 70% across responsive mobile and web applications.

Skills

Frontend: JavaScript, TypeScript, React.js, Next.js, HTML5, CSS3, responsive design, Material UI, TailwindCSS
Backend: Python, FastAPI, Flask, Node.js, Express.js, RESTful APIs, integration services, workflow automation
Data: PostgreSQL, MySQL, SQL Server, Azure SQL, MongoDB, Firebase, relational databases, SQL, data validation
Cloud & DevOps: AWS S3, AWS RDS, Microsoft Azure, Docker, Kubernetes, Git, GitHub Actions, Jenkins, CI/CD
AI & Quality: OpenAI, Anthropic Claude, Qwen, LLM concepts, AI-assisted development, PyTest, Jest, code reviews, Agile/Scrum

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*

- Built a **secure financial application** supporting 50,000+ users and 1M+ transactions with responsive interfaces, bank integrations, real-time updates, MongoDB persistence, advanced filtering, and Kubernetes-based CI/CD automation.

Big-Brain Live | *PostgreSQL, LLMs, REST APIs*

- Built an **AI-enabled document application** processing 50,000+ records with authenticated uploads, PostgreSQL metadata, LLM summarization, semantic retrieval, REST APIs, and collaborative workflows, reducing review time 60%.

HMIS Live | *TypeScript, REST APIs, Sentry*

- Developed a **client-focused business workflow application** with secure role-based access, responsive dashboards, appointments, REST integrations, notifications, and monitoring, supporting 100+ daily workflows while reducing administrative workload 30%.
