Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **Java** and **Spring Boot** services, **REST APIs**, and **SQL**-backed platforms, with test-driven development, CI/CD, and production support across cloud environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed multi-tenant **relational schemas** on **Azure SQL** and **SQL Server** for 500+ users, tuning indexes and **SQL** query plans that cut dashboard latency from 1.2s to 350ms.
- Built **REST** services with validation, reconciliation checks, and **CI/CD**-backed releases across 5K+ monthly data-integration jobs, maintaining 99%+ reliability while resolving recurring defects found in live production environments.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **REST APIs** and React views for an AI grading platform on **MySQL**/AWS RDS, shipping features through GitHub Actions **CI/CD** pipelines for 150+ instructors and 10K+ daily requests.
- Built a concurrent batch-processing engine with multithreading and fault-tolerant execution, processing 1K+ files per batch while keeping API response times stable under peak load and cutting feedback turnaround 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Maintained 20+ unit and integration test suites using **Mockito** and PyTest under Jenkins **CI**, catching regressions nightly across three operating systems and improving pipeline efficiency by 68%.
- Troubleshot and optimized large-scale **API integrations** with **OOP** design patterns and AWS Glue in **Agile** sprints with Microsoft/GitHub stakeholders, improving response times 30% and cutting technical debt 20%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built a MERN platform with **RESTful APIs**, WebSockets, and **Azure SQL** persistence across 8 microservices, syncing 2M+ records with role-based access and JWT authentication for six business workflows.
- Automated Jenkins **CI/CD** with Docker packaging and staged approvals, cutting deployment time 50% while Sentry and Azure Monitor surfaced production issues for rapid triage across release cycles.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Delivered a **Spring Boot** and Flask API layer with Firebase synchronization for a cross-platform booking product, sustaining sub-200ms responses across 50K+ records on Android, iOS, and web.
- Gathered requirements and presented the system architecture to the client, mapping 12+ integration points across APIs, payments, and data sync before implementation, reducing design errors by 25%.

Skills

Languages: Java 21, Python, JavaScript/TypeScript, SQL, C++, Bash
Backend & APIs: Spring Boot, Spring Framework, Spring Data JPA, Hibernate, REST APIs, Flask, FastAPI, Node.js
Databases: PostgreSQL, SQL Server, MySQL, Azure SQL, H2, MongoDB, Query Tuning, Schema Design
Testing & Quality: JUnit 5, Mockito, MockMvc, PyTest, Test-Driven Development, Code Reviews, Agile/Scrum
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Production Support

Projects

RiskGateway | *Java 21, Spring Boot, Spring Data JPA, SQL, JUnit 5*

- Built a **Java 21/Spring Boot** transaction gateway with idempotent replay, rate limiting, retries, and a circuit breaker over **Spring Data JPA** and **SQL**, covered by **38 tests** including **MockMvc**.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an AI-powered **SQL** development workspace on the Chat2DB codebase across **Java** and TypeScript, supporting 10+ databases including PostgreSQL and SQL Server with Docker-based deployment workflows for schema exploration.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*

- Built a fintech platform on Kubernetes with Next.js, TypeScript, and MongoDB supporting 50,000+ users and 1M+ transactions through Plaid bank linking, token-based access controls, and real-time updates.
