Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer experienced in **Java, C#, JavaScript, SQL, HTML, and XML**, contributing across coding, testing, debugging, and code reviews, with prompt-driven LLM workflows and Agile delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Wrote specifications and implemented SQL Server and PostgreSQL schemas for a multi-tenant platform serving 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds through query optimization.
- Coded, tested, and debugged data pipelines processing 5,000+ monthly jobs with validation, reconciliation, and CI/CD-backed releases, achieving 99%+ reliability across testing and deployment phases at production scale.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Integrated OpenAI LLM APIs and prompt chains for rubric generation, grading, and feedback, reviewing model output for correctness while reducing customer feedback turnaround time 60% at scale.
- Implemented JavaScript React interfaces and Python Flask backends serving 150+ instructors, processing 10,000+ daily requests with MySQL persistence, automated tests, and stable performance end to end at scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Coded object-oriented Java services with 20+ unit and integration tests across Windows and Linux, participating in Agile code reviews while increasing pipeline efficiency 68% at production scale.
- Investigated and resolved API defects using SQL, AWS Glue, and S3, improving response times 30% for low-bandwidth users while reducing technical debt 20% end to end at scale.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed JavaScript React and HTML application components with REST APIs and eight microservices, syncing two million records while reducing resource wastage 42% and increasing conversions 15% at scale.
- Participated in Agile code reviews and Jenkins-based testing, cutting deployment time 50% while using Sentry to debug production issues and complete defect fixes at production scale reliably.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Translated client specifications into Flask APIs and React booking and payment modules, mapping 12+ integration points and presenting design documentation before implementation for end users at production scale.
- Delivered HTML, JavaScript, and Flask solutions across 50,000+ records, validating implementation against specifications while achieving sub-200-millisecond responses and reducing manual refund handling 70% for customers at production scale.

Skills

Languages: Java, C#, C++, JavaScript, SQL, HTML, XML
Web & .NET: Angular.js, React, ASP.NET Core, .NET, Node.js, REST APIs
Data: SQL Server, PostgreSQL, MySQL, MongoDB, Data Modeling
AI: OpenAI API, LLM APIs, Prompt Engineering, NLP, LLM Systems
Systems: Windows, Linux, Git, Docker, Kubernetes, Azure DevOps, Jenkins
Practices: Agile, Scrum, Code Review, Debugging, Unit Testing, CI/CD, JIRA

Projects

LedgerFlow | *C#, .NET, SQL*
- Built a C# ASP.NET Core Web API platform with Entity Framework Core and SQL Server, deploying to Azure Kubernetes Service through Azure DevOps CI/CD pipelines with xUnit test coverage at scale.

Chat2SQL Code | *Java, SQL, Windows*
- Built Java and TypeScript services supporting SQL Server, PostgreSQL, and MySQL on Windows and Linux, configuring Docker workflows with schema validation and reliable integration at production scale.

PiXMod Live | *Angular.js, JavaScript*
- Designed a Next.js and Angular.js image platform using CLIP and Stable Diffusion, processing 1,000+ edited assets with MongoDB storage and a responsive HTML interface for end users at scale.
