Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

IT support and software professional with 2+ years troubleshooting production systems, resolving user-impacting issues, documenting solutions, and supporting secure cloud applications. Experienced in incident triage, access controls, monitoring, SaaS operations, networking fundamentals, and customer-focused communication.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Software Engineering, Database Systems, Web Technologies, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Supported Python and Azure SQL services for 500+ users, investigating access, performance, and data issues while optimizing queries and workflows to reduce response latency from 1.2 seconds to 350 milliseconds.
- Triaged failed processing requests using logs, job states, and monitoring data, introducing recovery controls and documentation that tripled throughput while improving issue resolution consistency and production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Provided production support for Flask services handling 10,000+ daily requests, troubleshooting authentication, data, and application errors while communicating clear resolutions for issues affecting more than 150 users.
- Implemented monitoring, validation, and recovery for 1,000+ concurrent files, reducing turnaround 60% while improving status visibility, repeatable troubleshooting, and reliable customer service delivery under peak workloads.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Supported secure services and data integrations using AWS Glue, S3, SQL, filtering, pagination, and caching, improving response times 30% and processing efficiency 68% across connected enterprise applications.
- Maintained 20+ automated validation suites with Jenkins, PyTest, and Mockito, accelerating incident investigation, regression verification, documented handoffs, and reliable releases across Windows, Linux, and macOS production environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Supported eight Node.js microservices with authentication, role-based access, WebSocket messaging, and state synchronization, diagnosing application and data issues across more than two million Azure SQL production records.
- Automated functional checks, staged deployments, and service monitoring through Jenkins, Docker, and Azure, reducing release time 50% while improving operational visibility, recovery consistency, and overall production availability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Supported React, TypeScript, and Flask applications spanning 12+ integration points, translating stakeholder needs into technical workflows and maintaining consistent sub-200-millisecond responses across more than 50,000 records.
- Troubleshot production issues through logging and validation, reducing manual handling 70% while documenting architecture, communicating resolution status to stakeholders, and supporting version-controlled release handoffs across distributed teams.

Skills

Service Support: Incident triage, issue prioritization, user support, troubleshooting, root-cause analysis, log analysis, monitoring, escalation, status communication, technical documentation, knowledge transfer
Systems & Networking: Windows, Linux, macOS, TCP/IP fundamentals, DNS concepts, HTTP, REST APIs, SaaS applications, client-server architecture, access management, role-based access
Cloud & Data: AWS, Azure, S3, AWS Glue, PostgreSQL, Azure SQL, SQL Server, MySQL, MongoDB, database queries, data validation, secure integrations
Operations & Tools: Jira, Git, Jenkins, CI/CD, Docker, Kubernetes, PyTest, Mockito, release support, production monitoring, automated validation, Agile collaboration, process improvement

Projects

Chat2SQL | Code | *Java, TypeScript, SQL, Docker, Maven*
- Built a modular Java and TypeScript database tool supporting 10+ engines with schema-aware SQL generation, query validation, metadata exploration, error handling, automated testing, and Docker-backed CI/CD deployment.

HMIS | Live | *Healthcare Workflows, TypeScript, REST APIs, Sentry*
- Built a healthcare workflow platform with role-based access, scheduling, notifications, REST integrations, and Sentry monitoring, reducing administrative workload 30% through reliable dashboards and clearly documented operational workflows.

FinNexus | Live | *TypeScript, Next.js, REST APIs, WebSockets, MongoDB, Kubernetes*
- Built a scalable platform supporting 50,000+ users and one million transactions, integrating secure REST APIs, real-time visualizations, MongoDB queries, Kubernetes deployment, production monitoring, and automated release workflows.
