Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer experienced in translating **business requirements** into code modules and **business software** solutions across the **SDLC**, using Java, Python, REST web services, and database technologies in Agile teams.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Translated business requirements into a multi-tenant platform on Azure SQL and PostgreSQL for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds through query optimization.
- Implemented business software data pipelines processing 5,000+ monthly jobs with validation and CI/CD-backed releases across analysis, design, build, testing, and deployment, achieving 99%+ reliability at production scale.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Supported analysis, design, development, testing, and deployment of React and Flask web services serving 150+ instructors and processing 10,000+ daily requests with stable production performance at scale.
- Configured, tested, and debugged OCR and API modules, implementing automated tests and documented fallback paths while reducing customer feedback turnaround time 60% for business software at scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Contributed from requirements analysis through deployment for Java and Python web services, automating 20+ tests and Jenkins CI/CD while increasing pipeline efficiency 68% in Agile sprints at scale.
- Optimized API integrations using SQL, AWS Glue, and S3, improving response times 30% for low-bandwidth users while reducing technical debt 20% across production database-backed ETL workflows end to end.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed a React business system with REST web services and eight microservices, syncing two million records while reducing resource wastage 42% and increasing conversions 15% at scale.
- Participated in code reviews and Jenkins-based testing for business software deployments, cutting deployment time 50% while using Sentry to debug production issues in Agile delivery at scale.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Translated client requirements and functional specifications into Flask web services and React Native booking modules, mapping 12+ integration points before implementation for end users at production scale.
- Delivered database-backed Flask and Firebase business solutions across 50,000+ records, validating implementation against specifications while achieving sub-200-millisecond responses and reducing manual refund handling 70% at production scale.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL
Web Services: REST APIs, Flask, FastAPI, Node.js, React
Databases: PostgreSQL, MySQL, Azure SQL, MongoDB, SQL Server
SDLC: SDLC, Agile, JIRA, CI/CD, Code Review, Debugging
Delivery: Jenkins, Docker, Kubernetes, Git, AWS, Azure, Linux, GitHub Actions, Spring Boot

Projects

HMIS - Hospital Management Information System Live | *Business Software, SDLC*
- Translated healthcare workflow requirements into TypeScript appointment, consent, and notification modules, adding Sentry monitoring while reducing record retrieval time 50% and administrative workload 30% for operational teams.

Chat2SQL Code | *Database Technologies, Java*
- Built Java and TypeScript web services supporting PostgreSQL, MySQL, and 10+ databases, configuring Docker workflows with schema synchronization, validation, and reliable cross-platform deployment end to end at scale.

FinNexus Live | *Business Systems, Web Services*
- Designed a Next.js TypeScript business platform supporting 50,000+ users and one million transactions, implementing Plaid web services, MongoDB persistence, and CI/CD automation for reliable delivery at scale.
