Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **Python/Java backends, enterprise integrations, and cloud data applications**; experienced eliciting requirements, developing resilient microservices, ETL, analytics, machine learning, DevOps automation, documentation, and root-cause troubleshooting.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Gathered requirements and built **data-centric backend services and enterprise integrations** across Python, FastAPI, PostgreSQL, SQL Server, Azure SQL, and cloud storage, supporting 500+ users and 10,000+ records.
- Engineered resilient ETL and asynchronous microservices processing 5,000+ monthly workflows and 1,000+ AI jobs, improving throughput 3x while sustaining 99%+ uptime and accuracy through validation and failure isolation.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Translated stakeholder workflows into **React interfaces and Python services** for uploads, analytics, grading, and review, serving 150+ users and 10,000+ daily requests with stable production performance.
- Integrated OpenAI, Claude, and Qwen behind secure adaptable APIs, developing machine-learning workflows with multithreaded processing, testing, documentation, GitHub Actions, and AWS deployment while reducing feedback turnaround 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **scalable cross-platform microservices and enterprise integrations** using Java, Python, REST APIs, AWS Glue, S3, and SQL, improving response times 30%, pipeline efficiency 68%, and data consistency.
- Partnered with Microsoft and GitHub stakeholders to elicit requirements, review code, troubleshoot technical root causes, and automate builds, deployments, unit tests, integration tests, documentation, and operational reports.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **reliable highly available data and analytics services** across Node.js, React, eight microservices, and Azure SQL, securely synchronizing 2M+ records through REST APIs, WebSockets, and relational models.
- Investigated technical production systems using Sentry, Azure Monitor, Kibana, and usage analytics, resolving root causes while achieving 95%+ build validation, reducing deployment time 50%, and improving scalability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Elicited requirements from non-technical customers and developed **Flask APIs and analytics pipelines** for booking, payments, and review workflows, integrating Firebase, Databricks, and Spark across 50,000+ records.
- Mapped 12+ complex enterprise integration points and documented end-to-end operational production data flows, implementing secure webhooks, real-time synchronization, and sub-200-millisecond services while reducing manual refund handling 70%.

Skills

Languages: Python, Java, SQL, JavaScript, TypeScript, C++, Bash
Integration: REST APIs, microservices, FastAPI, Flask, Node.js, ETL, systems of record, review workflows
Data & AI: PostgreSQL, SQL Server, Azure SQL, data warehousing, big data, analytics, machine learning
Cloud & DevOps: Google Cloud, Microsoft Azure, AWS, Terraform, Docker, Kubernetes, Git, Jenkins, CI/CD
Engineering: Business analysis, requirements elicitation, distributed systems, testing, documentation, root-cause analysis, Agile

Projects

HMIS Live | *Healthcare, REST APIs, Monitoring*

- Built a **healthcare workflow application** with consent-based patient access, provider dashboards, appointments, REST integrations, notifications, and Sentry monitoring, halving record retrieval time while supporting 100+ daily workflows and reducing administration 30%.

Big-Brain Live | *AI, Data Pipelines, PostgreSQL*

- Engineered a **cloud data-ingestion and indexing platform** processing 50,000+ records with incremental updates, PostgreSQL metadata, validation, REST APIs, semantic analytics, and performance tuning, reducing retrieval latency 40% and review time 60%.

Chat2SQL Code | *Java, TypeScript, Enterprise Integration*

- Enhanced a **cross-platform data-integration application** supporting 10+ SQL and NoSQL systems with schema exploration, structure synchronization, query generation, validation, Docker configurations, and reusable development and deployment workflows.
