Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Deployment-focused engineer with 2+ years supporting **cross-platform software, integration testing, quality assurance, and automation**; experienced in project requirements, executable builds, virtual machines, CI/CD, deployment documentation, metrics, and end-user verification.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Analyzed stakeholder requirements and deployed reliable software supporting 500+ end users, coordinating implementation, testing, and release tasks while reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Documented project metrics and validated 5,000+ monthly integration workflows with reconciliation, error handling, and release checks, achieving 99%+ reliability while improving operational processes and support readiness.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Supported pre-deployment and post-deployment verification for successful software serving 150+ users and 10,000+ daily production requests, testing changes, resolving issues, and reducing feedback turnaround time 60%.
- Developed Python automation scripts for secure file processing, batch execution, and deployment validation, handling 1,000+ files per run while documenting results and maintaining stable production performance.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built and installed reliable cross-platform executables on Windows, Linux, and macOS virtual machines, automating nightly deployment, integration testing, unit testing, and reporting across 20+ comprehensive validation suites.
- Coordinated requirements, deployment tasks, and issue resolution with external Microsoft and GitHub engineers, generating detailed CSV metrics, coverage summaries, and failure logs while improving data-processing efficiency 68%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Automated repeatable build, test, packaging, and safe staged deployment workflows using Jenkins, Docker, and Git, achieving 95%+ build validation while reducing deployment time 50% across production releases.
- Monitored deployed production applications with Sentry, Azure Monitor, and Kibana, troubleshooting complex integration issues across two million synchronized records and improving project delivery through documented quality checks.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Worked directly with customers before implementation to analyze requirements, present technical deployment architecture, and map 12+ integration points, reducing design errors 25% while coordinating cross-platform product delivery.
- Verified backend integrations and real-time workflows across mobile and web platforms, resolving software issues and documenting deployment behavior while improving cross-platform compatibility 15% across 50,000+ records.

Skills

Deployment: Requirements analysis, project planning, deployment coordination, release management, verification, support
Platforms: Windows, Linux, macOS, Unix, virtual machines, Docker, Kubernetes, Azure, AWS
Automation: Python, Shell, Bash, Jenkins, GitHub Actions, CI/CD, build automation, deployment scripting
Quality: System testing, integration testing, unit testing, quality assurance, regression testing, troubleshooting
Operations: End-user support, project metrics, documentation, CSV reporting, Sentry, Azure Monitor, Kibana, Jira

Projects

Linguistix | *Python, AWS, Deployment Automation*

- Developed a reliable containerized deployment pipeline with automated build, validation, and release checks, achieving 87% measured accuracy and dependable operation through repeatable Python-based CI/CD workflows on AWS.

Chat2SQL Code | *Cross-Platform Deployment, Docker*

- Configured reliable cross-platform development and deployment workflows using Docker, Maven, Node.js, and Yarn, supporting multi-environment local installation, debugging, and dependable operation across Windows, Linux, and macOS environments.

FinNexus Live | *Kubernetes, CI/CD, Monitoring*

- Managed Kubernetes deployment automation for a platform supporting 50,000+ users and one million transactions, maintaining scalable performance, real-time visibility, secure access, and repeatable CI/CD-based product delivery.
