Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Deployment-focused engineer experienced in **cross-platform software deployments, automation scripts, integration testing, quality assurance, and rollout documentation** for end users and stakeholders.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Analyzed software requirements for a multi-tenant platform on Azure SQL and PostgreSQL serving 500+ users, recommending schema and access-control designs that reduced dashboard latency from 1.2 seconds to 350 milliseconds.
- Managed CI/CD-backed deployments of data pipelines processing 5,000+ monthly jobs with validation and reconciliation, achieving 99%+ reliability while verifying successful delivery in production environments end to end.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Supported deployment of React and Flask product workflows for instructor end users, serving 150+ instructors and processing 10,000+ daily requests with stable production performance reliably at scale.
- Developed automated tests and documented fallback paths for OCR and API failures, reducing customer feedback turnaround time 60% while improving deployment reliability for customers at production scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform Java and Python microservices with automated VM testing and 20+ unit and integration test suites using Jenkins and PyTest for quality assurance across Windows, Linux, and macOS at scale.
- Developed Jenkins automation scripts and CSV test reports for nightly deployments, increasing pipeline efficiency 68% while sharing coverage and failure metrics with Microsoft and GitHub stakeholders at scale.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Automated Jenkins and Docker deployments for a React business platform, cutting deployment time 50% while syncing two million records across eight microservices end to end at production scale.
- Implemented integration tests and Sentry monitoring for production releases, using analytics insights to verify successful delivery while reducing resource wastage 42% for operational users reliably at scale.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Analyzed client software needs, mapped 12+ integration points, and presented architecture recommendations before deploying Flask and React booking and payment experiences for end users at production scale.
- Delivered Flask and Firebase solutions across 50,000+ records, verifying implementation against specifications while achieving sub-200-millisecond responses and reducing manual refund handling 70% for customers at production scale.

Skills

Scripting: Python, Bash, Java, JavaScript, SQL
Deployment: CI/CD, Jenkins, Docker, Kubernetes, GitHub Actions
Platforms: Windows, Linux, macOS, AWS, Azure
Quality: Integration Testing, Quality Assurance, PyTest, Mockito, Sentry
Practices: Cross-platform, Documentation, Agile, Git, REST APIs, Flask, FastAPI, Node.js, PostgreSQL, Debugging

Projects

Chat2SQL Code | *Cross-Platform Deployment*
- Configured Java and TypeScript Docker workflows across Windows, macOS, and Linux, supporting schema synchronization, validation, and reliable cross-platform deployment for 10+ databases end to end at scale.

Linguistix | *Automation Scripts, CI/CD*
- Developed and deployed a containerized Python REST API on AWS CodePipeline and ECS with automated CI/CD releases and validation checks, achieving 87% accuracy and production-grade reliability at scale.

FinNexus Live | *Deployment Automation*
- Implemented Kubernetes deployment automation and CI/CD pipelines for a TypeScript platform supporting 50,000+ users and one million transactions, maintaining reliable production delivery with MongoDB persistence at scale.
