Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Full-stack software engineer with 2+ years shipping production features across React, TypeScript, Python, Node.js, APIs, and data layers. Experienced in Kubernetes, Docker, cloud infrastructure, CI/CD, secure development, automated testing, observability, accessibility, and production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Software Engineering, Database Systems, Web Technologies, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed and shipped Python APIs and Azure SQL features for 500+ users, translating ambiguous requirements into indexed schemas and responsive workflows while reducing latency from 1.2 seconds to 350 milliseconds.
- Refactored distributed processing with explicit states, caching, failure isolation, automated tests, structured logging, and recovery, tripling throughput while improving system observability, long-term maintainability, and overall production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed Flask REST services and React interfaces handling 10,000+ daily requests, implementing secure authentication, data workflows, loading states, and error handling while resolving issues affecting more than 150 users.
- Built multithreaded processing for 1,000+ files with relational persistence, automated tests, progress monitoring, and failure recovery, reducing turnaround 60% while maintaining responsive behavior under concurrent workloads.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Developed scalable Python services and data integrations using AWS Glue, S3, SQL, pagination, and caching, improving response times 30% and processing efficiency 68% across secure enterprise applications.
- Maintained 20+ unit and integration suites with Jenkins, PyTest, and Mockito, accelerating defect isolation, code reviews, regression verification, and dependable CI/CD releases across multiple production environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed React, TypeScript, and Node.js features across eight microservices with authentication, REST APIs, WebSockets, and state synchronization, securely processing more than two million Azure SQL production records.
- Automated Docker builds, functional tests, staged deployments, and monitoring through Jenkins and Azure, reducing release time 50% while improving structured logging, deployment consistency, and overall production availability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Collaborated directly with users to translate complex business workflows into responsive React, TypeScript, and Flask features across 12+ integrations and 50,000+ records with consistent sub-200-millisecond responses.
- Documented architecture and operational handoffs while troubleshooting production issues through logging and validation, reducing manual handling 70% and supporting secure, version-controlled software releases across distributed engineering teams.

Skills

Languages & Frontend: Python, TypeScript, JavaScript, Java, SQL, React, Angular.js, Next.js, Node.js, HTML, CSS, responsive design, accessibility awareness, state management
Backend & Data: Flask, FastAPI, REST APIs, GraphQL familiarity, WebSockets, microservices, PostgreSQL, Azure SQL, MySQL, MongoDB, schema design, caching, distributed patterns
Cloud & DevSecOps: AWS, Azure, GCP, Docker, Kubernetes, Git, Jenkins, GitHub Actions, CI/CD, secure coding, authentication, RBAC, secrets awareness, deployment automation
Quality & Operations: Unit testing, integration testing, PyTest, Mockito, code reviews, debugging, structured logging, monitoring, metrics, performance analysis, incident response, technical documentation, production support

Projects

PiXMod | Live | *React, Next.js, TypeScript, MongoDB, Stripe*
- Built a responsive full-stack product using React, Next.js, MongoDB, and Stripe, implementing accessible user workflows, API integrations, automated validation, and subscription features that increased premium conversion 18%.

HMIS | Live | *MERN, TypeScript, REST APIs, Sentry, Secure Workflows*
- Built a secure TypeScript workflow platform with REST APIs, RBAC, scheduling, notifications, responsive dashboards, and Sentry monitoring, reducing administrative workload 30% through validated data and documented releases.

FinNexus | Live | *TypeScript, REST APIs, WebSockets, Kubernetes, MongoDB*
- Built a real-time platform supporting 50,000+ users and one million transactions, integrating WebSocket updates, failure monitoring, Kubernetes deployment, automated releases, and performance-tuned services under high-volume workloads.
