Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer experienced in **TypeScript, React, React Native, Node.js, Express, MongoDB, payments, and AI-powered products**, owning end-to-end features from requirements through customer-facing delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Owned end-to-end platform services processing 5,000+ monthly jobs with explicit state transitions, failure isolation, validation, and reconciliation, increasing concurrent throughput 3x while reliably achieving 99%+ production reliability.
- Translated user requirements into multi-tenant SQL storage for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds through indexing, caching, and documented access-pattern decisions at scale.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Shipped React and Flask product workflows integrating multimodal AI models, OCR, AWS RDS, and REST APIs, supporting 150+ instructors and processing 10,000+ daily requests with reliable performance at scale.
- Collaborated on modular full-stack features, automated tests, diagnostics, and cost tracking while reliably reducing feedback turnaround time 60% through customer-facing grading, rubric, and file-ingestion workflows at scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Owned Java and Python microservices with REST APIs, AWS Glue, S3, SQL, and Docker from requirements through deployment, improving response times 30% and reducing payload sizes 25% at scale.
- Wrote technical reports, coverage summaries, and failure logs while automating 20+ tests through Jenkins CI/CD and collaborating with Microsoft and GitHub stakeholders during Agile code reviews at scale.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built React, Node.js, and Express microservices for authentication, resource allocation, billing, and notifications, reliably synchronizing two million MongoDB and Azure SQL records across customer operations at scale.
- Automated Docker-based testing and deployments through Jenkins, reducing release time 50% while using code reviews, monitoring, and analytics to improve maintainable full-stack delivery across production release cycles.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Designed the end-to-end architecture, mapped 12+ integration points, and presented recommendations to the client before implementing React Native, TypeScript, Flask, booking, payment, and real-time status workflows at scale.
- Built PCI-compliant payment APIs across 50,000+ records with webhook refunds, disputes, and coupons, delivering sub-200-millisecond responses and reducing manual refund handling by 70% for customers at scale.

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML, CSS, Shell
Full Stack: React, React Native, Next.js, Node.js, Express, FastAPI, Flask, REST APIs, WebSockets
Data/Payments: MongoDB, PostgreSQL, Azure SQL, Stripe, Plaid, Firebase, Docker, Kubernetes, AWS
Delivery: Git, CI/CD, Jenkins, Agile, code review, unit testing, technical documentation, customer collaboration

Projects

FinNexus Live | *TypeScript, MongoDB, Payments*
- Built a TypeScript and Next.js fintech platform supporting 50,000+ users and one million transactions with MongoDB, Plaid bank linking, secure token controls, real-time updates, and Kubernetes-based CI/CD delivery.

PiXMod Live | *Stripe, MongoDB, Full-Stack SaaS*
- Built a Next.js AI platform integrating CLIP, SAM, Stable Diffusion, MongoDB, and Stripe subscriptions, processing 100,000+ image embeddings while delivering semantic search, generative editing, and billing workflows.

Chat2SQL Code | *TypeScript, Node.js, Developer Tooling*
- Developed a TypeScript and Java workspace supporting 10+ databases with schema-aware query generation, structured validation, Docker workflows, and reliable cross-platform local deployment for technical users at scale.
