Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

IT analyst with 2+ years organizing **applications, integrations, data flows, process information, and technology dependencies**; experienced in architecture diagrams, cloud platforms, dashboards, metrics, technical research, documentation, and stakeholder collaboration.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Partnered with application owners and stakeholders to collect, validate, and organize system requirements, integrations, data flows, and dependencies across platforms supporting 500+ users and 10,000+ records.
- Prepared dashboards and operational metrics for technology planning, analyzing application performance and data quality while reducing latency from 1.2 seconds to 350 milliseconds and sustaining 99%+ reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Mapped complex business processes spanning uploads, analysis, dashboards, and reporting, translating stakeholder needs into modular architecture documentation for applications serving 150+ users and 10,000+ daily requests.
- Carefully researched emerging AI technologies and compared OpenAI, Anthropic, and Qwen capabilities, summarizing performance, reliability, cost, and key workflow impacts while reducing business feedback turnaround time 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Documented cross-platform application integrations, critical technology dependencies, and validation results across Windows, Linux, macOS, AWS Glue, and S3 while collaborating with global Microsoft and GitHub technology teams.
- Created detailed reports covering 20+ automated tests, code coverage, failures, and operational risks, improving data-processing efficiency 68% while supporting continuous improvement across distributed application environments and teams.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed clear architecture views for eight services covering authentication, resource allocation, customer management, billing, permissions, and notifications, organizing dependencies across two million synchronized records and Azure SQL.
- Prepared application health dashboards using Sentry, Azure Monitor, Kibana, and Google Analytics, identifying actionable application and process-improvement opportunities that reduced resource waste 42% and increased conversions 15%.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Collected stakeholder requirements and developed detailed process flows and architecture diagrams for booking, pricing, payment, notification, and reporting capabilities, documenting 12+ integrations and reducing design errors 25%.
- Presented detailed architecture artifacts and implementation considerations to customers, analyzing application, database, cloud, and mobile dependencies while supporting technology planning across 50,000+ operational records and workflows.

Skills

Architecture: Enterprise technology, application architecture, integration mapping, data flows, dependencies, process flows
Artifacts: Architecture diagrams, application documentation, technical reports, metrics, dashboards, presentations
Technology: Microsoft Azure, AWS, GCP, cloud computing, databases, networking, APIs, microservices
Analysis: System analysis, data quality, performance analysis, risk identification, technology research, problem-solving
Delivery: SDLC, IT operations, Agile, Jira, Git, requirements gathering, stakeholder collaboration, continuous improvement

Projects

Chat2SQL Code | *Technology Landscape, Databases, Integrations*
- Built a unified application workspace supporting 10+ database technologies, organizing schemas, integrations, platform dependencies, and cross-platform workflows while accelerating information discovery through AI-assisted reporting and query generation.

HMIS Live | *Business Processes, Architecture, Monitoring*
- Designed complex healthcare process flows for patient access, appointments, dashboards, notifications, and integrations, supporting 100+ daily workflows while reducing record retrieval time 50% and administrative workload 30%.

FinNexus Live | *Cloud Architecture, Data Flows, Analytics*
- Designed scalable cloud architecture mapping secure APIs, transaction data flows, Kubernetes deployment, and MongoDB dependencies for a platform supporting 50,000+ users and one million operational records.
