Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Application developer experienced in **React Native iOS and Android clients**, REST APIs, and web applications, coding, testing, and documenting software from business requirements through production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Translated business requirements into a multi-tenant web application on Azure SQL and PostgreSQL for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds through query optimization.
- Coded, tested, and deployed data pipelines processing 5,000+ monthly jobs with validation, reconciliation, and CI/CD-backed releases, achieving 99%+ reliability while maintaining technical documentation at production scale end to end.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Coded React web interfaces and Python Flask REST APIs serving 150+ instructor end users, processing 10,000+ daily requests with MySQL persistence and stable production performance at scale.
- Developed automated tests and documented fallback procedures for OCR and API failures, reducing customer feedback turnaround time 60% while debugging production issues for end users at scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Coded object-oriented Java and Python services with 20+ unit and integration tests across Windows and Linux, producing CSV test reports while increasing pipeline efficiency 68% in Agile delivery at scale.
- Investigated API and ETL production issues using AWS Glue and S3, improving response times 30% for low-bandwidth users while reducing technical debt 20% across database-backed workflows end to end.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed a React web application with REST APIs and eight microservices, syncing two million records while reducing resource wastage 42% and increasing conversions 15% end to end.
- Participated in functional testing, code reviews, and OWASP Dependency-Check plus Snyk scans, cutting deployment time 50% while debugging production issues reliably in Agile delivery at production scale.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Implemented React Native clients for iOS and Android with TypeScript React web dashboards, mapping 12+ integration points after analyzing client requirements for booking and payment experiences at scale.
- Delivered Flask and Firebase REST APIs across 50,000+ records for iOS, Android, and web users, verifying successful delivery while achieving sub-200-millisecond responses for customers at production scale.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS
Mobile & Web: React Native, iOS, Android, React, Next.js, REST APIs
Backend: Flask, FastAPI, Node.js, Express.js, Firebase, Spring Boot
Databases: PostgreSQL, MySQL, MongoDB, Azure SQL, SQL Server
Systems: Windows, Linux, Git, Docker, Jenkins, Kubernetes, AWS, Azure
Practices: Agile, CI/CD, Unit Testing, Integration Testing, JIRA, OWASP, Documentation

Projects

HMIS - Hospital Management Information System Live | *Web Application, Requirements*
- Translated business requirements into TypeScript appointment, consent, and notification modules, adding Sentry monitoring while reducing record retrieval time 50% and administrative workload 30% for operational end users.

FinNexus Live | *Web Application, REST APIs*
- Designed a Next.js TypeScript client/server platform supporting 50,000+ users and one million transactions, implementing Plaid REST APIs, MongoDB persistence, and CI/CD automation for reliable delivery at scale.

Chat2SQL Code | *Windows, Linux, Documentation*
- Built Java and TypeScript web services supporting PostgreSQL and MySQL on Windows, Linux, and macOS, configuring Docker workflows with schema validation and maintainable technical documentation at scale.
