Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

AI workflow engineer experienced in **LLMs, automation, research, summarization, dashboards, CRM workflows, analytics, and customer-facing solutions**, turning complex data into repeatable tools and measurable business outcomes.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Built repeatable AI workflows processing 5,000+ monthly jobs with FastAPI, LLM orchestration, validation, and structured state tracking, increasing concurrent throughput 3x while reliably sustaining 99%+ production reliability.
- Designed multi-tenant dashboards and data models for 500+ users, transforming structured records into accessible insights while reducing dashboard latency from 1.2 seconds to 350 milliseconds through optimization.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Built prompt chains across GPT-4o, Claude, and Qwen for answer generation, rubric creation, grading, feedback, and reasoning, supporting 150+ users and efficiently processing 10,000+ daily requests at scale.
- Created AI-assisted workflows, dashboards, and model-usage tracking that structured uploaded information, estimated token costs, surfaced actionable feedback, and reduced customer turnaround time 60% through repeatable automation at scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Automated data workflows consolidating customer activity logs into unified formats for analytics and API consumption, increasing pipeline efficiency 68% while reducing response times 30% and technical debt 20%.
- Collaborated with Microsoft and GitHub stakeholders to translate requirements into tested cross-platform solutions, generating automated reports, coverage summaries, and failure logs across recurring nightly delivery workflows at scale.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built CRM services for lead management, customer records, interactions, notifications, and analytics, synchronizing two million records while reducing resource wastage 42% and increasing lead conversions 15% at scale.
- Used Google Analytics, Sentry, Azure Monitor, and Kibana to evaluate usage, traffic sources, performance, and drop-off patterns, translating operational signals into prioritized improvements across customer-facing workflows at scale.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Mapped 12+ integration points and presented solution recommendations to the client, translating business requirements into cross-platform booking, pricing, payment, notification, and real-time status capabilities for customer operations.
- Developed customer-facing workflows across 50,000+ booking records, integrating analytics, notifications, payment events, and automated refunds while delivering sub-200-millisecond APIs and reducing manual refund handling 70% across operational workflows.

Skills

AI/Research: LLMs, GPT-4o, Claude, Qwen, prompt chains, semantic search, summarization, OCR, embeddings
Automation: Python, FastAPI, REST APIs, ETL, workflow automation, data validation, dashboards, reporting, documentation
GTM Analytics: CRM, lead management, customer records, conversion analysis, usage analytics, stakeholder collaboration
Data/Tools: SQL, PostgreSQL, MongoDB, AWS, Azure, Docker, Git, React, TypeScript

Projects

Big-Brain Live | *AI Research and Summarization*
- Built semantic research workflows over 50,000+ documents using LLaMA-2, FAISS, Pinecone, and REST APIs, delivering contextual summaries and sub-second retrieval while reducing analysis time 60% for 200+ users.

Trend Tracker with Fashion Recommendation System Live | *Market Signals and Personalization*
- Developed an AI-powered e-commerce recommendation workflow using React, AWS, and CNN models, improving personalization accuracy from 78% to 92% while serving three million users and generating 200,000 retentions.

FinNexus Live | *Revenue and Customer Analytics*
- Built a customer-facing fintech dashboard reliably supporting 50,000+ users and one million transactions with real-time updates, advanced filtering, secure bank linking, responsive interfaces, and automated deployment workflows.
