Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack developer with 2+ years building and supporting **enterprise applications** across TypeScript, JavaScript, SQL Server, and cloud environments; experienced in feature development, testing, debugging, production support, and end-user collaboration.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built and maintained internal **enterprise data applications** using TypeScript, JavaScript, FastAPI, PostgreSQL, and SQL Server for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Owned features from user requirements through implementation, testing, deployment, and production support, processing 5,000+ recurring monthly workflows with reconciliation checks, error handling, and 99%+ operational reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed responsive full-stack features, REST APIs, and relational database workflows serving 150+ end users and 10,000+ daily requests, improving application performance while maintaining clean, reusable code.
- Collaborated with business users to gather user feedback, troubleshoot defects, test changes, and document releases, reducing turnaround time 60% while supporting stable application behavior during peak workloads.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Diagnosed and resolved production issues across Windows, Linux, and macOS applications, optimizing APIs for low-bandwidth users and cutting payload sizes 25% through systematic debugging and performance analysis.
- Participated in code reviews and Agile delivery with Microsoft and GitHub engineers, implementing object-oriented components and 20+ automated tests while improving response times 30% and efficiency 68%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Implemented end-to-end features for a resource-management application using React, JavaScript, Node.js, REST APIs, and Azure SQL, supporting six business workflows and two million synchronized records across locations.
- Automated unit, integration, and end-to-end testing through Git-based pull-request pipelines, achieving 95%+ build validation and reducing code-review turnaround 25% across staged production release cycles for reliable deployments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Delivered web application features across a React TypeScript frontend, Flask backend, and relational data services, handling 50,000+ records with sub-200-millisecond responses across booking and payment workflows.
- Worked directly with customers to clarify requirements, test integrations, and resolve defects across 12+ application flows, reducing manual refund handling 70% and strengthening actionable end-user support documentation.

Skills

Languages: TypeScript, JavaScript, Java, Python, SQL, HTML, CSS, C++, Shell
Front End: Angular.js, React.js, Next.js, responsive design, componentization, accessibility, browser debugging
Back End: Node.js, Express.js, FastAPI, Flask, REST APIs, microservices, object-oriented programming
Data: SQL Server, Azure SQL, PostgreSQL, MySQL, relational databases, schema design, query optimization
Engineering: Git, source control, pull requests, code reviews, unit testing, integration testing, debugging, Jira, CI/CD, production support

Projects

HMIS Live | *TypeScript, MERN, APIs, Monitoring*

- Built a healthcare application with TypeScript, role-based workflows, REST integrations, Sentry monitoring, and user notifications, supporting 100+ daily appointments while reducing record retrieval time 50% and administration 30%.

Chat2SQL Code | *Java, TypeScript, SQL Server, Debugging*

- Extended a **Java and TypeScript enterprise codebase** supporting SQL Server and 10+ databases, implementing schema exploration, relational query workflows, validation, and cross-platform local debugging with Docker and Maven.

PiXMod Live | *Angular.js, Next.js, MongoDB*

- Developed modern responsive full-stack application features using Angular.js, Next.js, Stripe, and MongoDB, processing 1,000+ assets through reusable interface components, secure subscription workflows, and scalable data storage.
