# Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

## Summary

Junior software engineer experienced in **reporting, data validation, system maintenance, bug fixes, Java, JavaScript, Spring Boot, React, SQL, testing, and Agile delivery**, building reliable, usable web applications.

## Education

**University of Southern California, Los Angeles, CA** **August 2024 – May 2026**
*Master of Science in Computer Science* *GPA: 3.75/4*
**Coursework:** Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

**Pandit Deendayal Energy University, Gandhinagar, India** **November 2020 – May 2024**
*Bachelor of Technology in Computer Science and Engineering* *GPA: 3.88/4*
**Coursework:** Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

## Experience

**USC Dornsife** **LA, California**
*Software Engineer* *September 2025 – Present*
- Created and maintained data workflows processing 5,000+ monthly jobs, validating completeness through reconciliation checks, error handling, and documented state transitions while consistently achieving 99%+ reliability in production environments.
- Troubleshot report and dashboard discrepancies for 500+ users, reliably reducing latency from 1.2 seconds to 350 milliseconds through SQL transformations, normalized schemas, indexing, caching, and query optimization.

**Grad8** **LA, California**
*Software Engineer Intern* *June 2025 – August 2025*
- Enhanced React and Flask web applications integrating AWS RDS and REST APIs, supporting 150+ instructors and processing 10,000+ daily requests with stable performance and accurate grading workflows.
- Fixed ingestion, OCR, model, timeout, and API issues, adding unit tests, diagnostics, configuration-driven fallback behavior, and usage reports while reliably reducing customer feedback turnaround time by 60%.

**Aasma Technology Solutions** **India**
*Software Developer Engineer - (SecureSync)* *August 2023 – July 2024*
- Contributed Java and Python enhancements to existing applications, reliably improving API response times 30% and data accuracy through field filtering, pagination, caching, validation, and object-oriented design patterns.
- Created automated CSV reports, coverage summaries, and failure logs from 20+ unit and integration tests, reliably increasing nightly pipeline efficiency 68% across Windows, macOS, and Linux environments.

**Aasma Technology Solutions** **India**
*Full Stack Developer Intern - (VibrantChem)* *May 2023 – August 2023*
- Built React and Node.js functionality across eight microservices, accurately maintaining customer, billing, lead, notification, and reporting data while reliably synchronizing two million Azure SQL records across locations.
- Monitored application errors and performance through Sentry, Azure Monitor, Kibana, and Google Analytics, translating operational findings into improvements that reduced resource wastage 42% and increased conversions 15%.

**LST Capitals** **India**
*Web Developer Intern* *November 2022 – January 2023*
- Reviewed business requirements, mapped 12+ integration points, and clearly presented architecture recommendations to the client before implementing React, Flask, Firebase, Spring Boot, booking, payment, and notification functionality.
- Maintained and troubleshot APIs across 50,000+ records, reliably validating pricing, coupon, payment, refund, and real-time status data while delivering sub-200-millisecond responses and reducing manual refund handling 70%.

## Skills

**Languages**: Java, JavaScript, TypeScript, Python, SQL, HTML, CSS, Shell
**Web**: Spring Boot, React, Angular, Node.js, Flask, FastAPI, REST APIs, TailwindCSS
**Data/Reporting**: PostgreSQL, SQL Server, Azure SQL, MongoDB, report generation, data validation, reconciliation
**Quality**: Git, Agile, unit testing, integration testing, debugging, monitoring, CI/CD, Jenkins, PyTest

## Projects

**Chat2SQL** Code | *Reporting and Database Support*
- Built Java and TypeScript tooling supporting 10+ databases with schema synchronization, AI-assisted reports, dashboard generation, query validation, Docker workflows, and reliable cross-platform debugging across Windows, macOS, and Linux.

**FinNexus** Live | *Data-Rich Web Application*
- Developed a responsive TypeScript platform supporting 50,000+ users and one million transactions, reliably implementing advanced filtering, secure bank linking, real-time updates, MongoDB persistence, and automated deployment workflows.

**HMIS - Hospital Management Information System** Live | *Reliable People-Focused Technology*
- Built TypeScript workflows for consent-based patient access, appointments, and notifications, integrating Sentry monitoring and structured schemas while reliably reducing record retrieval time 50% and administrative workload 30%.
