Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer experienced in **C#, .NET, Python, FastAPI, Azure, Docker, PostgreSQL, and SQL Server**, building REST APIs, CI/CD pipelines, integrations, and monitored backend services.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 – Present*
- Developed Python FastAPI backend services and PostgreSQL plus SQL Server schemas on Azure for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds through query optimization.
- Built FastAPI integration pipelines processing 5,000+ monthly jobs with validation, reconciliation, and CI/CD-backed releases, achieving 99%+ reliability across testing and deployment phases end to end at production scale.

Grad8 **LA, California**
Software Engineer Intern *June 2025 – August 2025*
- Developed Python Flask REST APIs and React workflows serving 150+ instructors, processing 10,000+ daily requests with MySQL persistence, automated tests, and stable production performance end to end at scale.
- Integrated OpenAI LLM APIs and prompt chains to automate grading and documentation-style feedback, reviewing outputs while reducing customer feedback turnaround time 60% for instructors at production scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Built Java and Python integration services with Jenkins CI/CD and 20+ automated tests, increasing pipeline efficiency 68% while publishing reliable releases across Linux environments end to end at scale.
- Maintained API and ETL integrations using AWS Glue and S3, improving response times 30% while reducing technical debt 20% and documenting production workflows end to end at scale.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed Docker-packaged REST microservices on Azure App Services, syncing two million records while using Sentry and Azure Monitor for application telemetry and increasing conversions 15% at production scale.
- Automated Jenkins CI/CD testing and staged Docker deployments, cutting deployment time 50% while troubleshooting production issues for operational users in Agile delivery end to end at scale.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Mapped 12+ system integrations and presented architecture documentation after analyzing client requirements, then implemented Flask APIs for booking and payment workflows serving end users at production scale.
- Delivered database-backed Flask services across 50,000+ records, validating implementations against specifications while achieving sub-200-millisecond responses and reducing manual refund handling 70% for customers reliably at production scale.

Skills

Languages: C#, Python, Java, JavaScript, TypeScript, SQL
.NET & APIs: ASP.NET Core, FastAPI, Flask, REST APIs, Node.js, Entity Framework Core
Data: PostgreSQL, SQL Server, MySQL, MongoDB, Azure SQL
Cloud & CI: Azure, Docker, Kubernetes, CI/CD, Jenkins, Azure DevOps, Git, GitHub Actions
Observability: Sentry, Azure Monitor, Grafana, Kibana
Practices: Agile, Integration Testing, Unit Testing, Documentation, Debugging, JIRA, xUnit

Projects

LedgerFlow | *C#, .NET, Azure, SQL Server*
- Built C# ASP.NET Core Web API services with Entity Framework Core and SQL Server, deploying Docker containers to Azure Kubernetes Service through Azure DevOps CI/CD pipelines at scale.

Chat2SQL Code | *PostgreSQL, SQL Server*
- Built Java and TypeScript services supporting PostgreSQL, SQL Server, and MySQL, configuring Docker workflows with schema validation and reliable cross-platform integration end to end at production scale.

HMIS - Hospital Management Information System Live | *APIs, Observability*
- Developed TypeScript REST workflows for appointments and notifications, adding Sentry monitoring while reducing record retrieval time 50% and administrative workload 30% for operational teams reliably at scale.
