Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **secure SaaS applications, Node.js services, relational databases, and AI workflows**; experienced delivering maintainable features, APIs, testing, performance optimization, CI/CD automation, production support, and technical documentation.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **secure multi-tenant SaaS features and REST APIs** across FastAPI, PostgreSQL, SQL Server, and cloud storage, supporting 500+ users while reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Designed relational schemas, indexing, queries, and validation for 10,000+ records, improving database latency 35% while sustaining 99%+ production reliability across 5,000+ recurring monthly data-driven workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **scalable user-friendly React interfaces and Flask APIs** for uploads, dashboards, processing, history, and feedback, serving 150+ users and 10,000+ daily requests with stable production performance.
- Built production AI-assisted workflows integrating OpenAI, Claude, and Qwen to generate, evaluate, debug, and optimize outputs, shipping thoroughly tested features through Agile planning, code reviews, and CI/CD.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **reliable modern scalable microservices and Web Services** using OOP design patterns, SQL, caching, AWS Glue, and S3, improving response times 30%, pipeline efficiency 68%, and maintainability.
- Reduced technical debt 20% while collaborating with Microsoft and GitHub engineers through code reviews, thorough unit and integration testing, automated builds, deployment workflows, documentation, and Agile sprints.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **scalable Node.js and React SaaS features** across eight microservices for authentication, records, billing, permissions, communications, and notifications, securely synchronizing 2M+ records through REST APIs and WebSockets.
- Automated Docker and Jenkins build, test, and deployment processes, achieving 95%+ validation while reducing deployment time 50% and troubleshooting urgent production issues with Sentry, Azure Monitor, and Kibana.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed **secure scalable production data-driven applications and APIs** for booking, payments, refunds, and status workflows, supporting 50,000+ records through relational-style schemas, Firebase synchronization, and sub-200-millisecond responses.
- Owned customer features from requirements through production, securely integrating third-party Web Services, authentication, and webhooks while documenting 12+ interfaces and reducing manual refund handling 70% through automation.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS
Applications: Node.js, React.js, Next.js, Express.js, FastAPI, Flask, SaaS, REST APIs, Web Services
Databases: MySQL, PostgreSQL, SQL Server, MongoDB, schema design, querying, indexing, performance tuning
Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Git, Jenkins, GitHub Actions, CI/CD
Engineering: Design patterns, scalable architecture, security, TDD, automated testing, code reviews, production support, AI-assisted development

Projects

HMIS Live | *Public Service, TypeScript, Security*

- Built a **secure public-service workflow application** with role-based access, patient-history retrieval, appointments, dashboards, notifications, REST integrations, and Sentry monitoring, halving record retrieval time while reducing administrative workload 30%.

Big-Brain Live | *AI, PostgreSQL, REST APIs*

- Built an **AI-assisted SaaS platform** processing 50,000+ documents with authenticated uploads, PostgreSQL metadata, incremental indexing, semantic retrieval, REST APIs, and collaborative workflows, reducing retrieval latency 40% and review time 60%.

Chat2SQL Code | *Java, TypeScript, MySQL, Docker*

- Enhanced an **enterprise database application** across Java and TypeScript modules, supporting MySQL and 10+ systems with schema exploration, performance-aware query generation, Docker, Maven, AI-assisted reporting, and cross-platform workflows.
