Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Applications analyst and software professional with 2+ years implementing, configuring, testing, and supporting information systems for 500+ users. Experienced in requirements analysis, application functionality, data validation, troubleshooting, user workflows, technical documentation, training materials, and production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Software Engineering, Database Systems, Web Technologies, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Implemented and supported Python and Azure SQL application functionality for 500+ users, translating customer requirements into configured workflows while reducing response latency from 1.2 seconds to 350 milliseconds.
- Evaluated processing failures using logs, job states, and user reports, implementing tested configuration improvements and documentation that tripled throughput while strengthening application reliability and cross-functional support readiness.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Supported Flask and React applications handling 10,000+ daily requests, configuring authentication and workflow functionality while troubleshooting application and data issues affecting more than 150 active users.
- Created validation, progress monitoring, and recovery workflows for 1,000+ files, reducing turnaround 60% while improving status visibility, repeatable issue resolution, and reliable application functionality under peak demand.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Implemented application integrations using Python, AWS Glue, S3, SQL, pagination, and caching, improving response times 30% and processing efficiency 68% across connected information systems and workflows.
- Maintained 20+ validation suites with Jenkins, PyTest, and Mockito, accelerating issue analysis, regression verification, implementation testing, and dependable application releases across Windows, Linux, and macOS production environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Configured and enhanced React, TypeScript, and Node.js modules across eight services with authentication, workflow synchronization, and REST interfaces, reliably supporting more than two million Azure SQL records.
- Automated functional testing, staged implementation, and application monitoring through Jenkins, Docker, and Azure, reducing release time 50% while improving configuration consistency, support visibility, and overall production availability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Worked with key customers to analyze business needs and configure React, TypeScript, and Flask workflows across 12+ integrations and 50,000+ records with consistent sub-200-millisecond application responses.
- Created architecture guides and operational handoffs while troubleshooting application issues through logging and validation, reducing manual handling 70% and supporting customer training and reliable version-controlled implementations.

Skills

Application Analysis: Requirements gathering, workflow analysis, system configuration, functionality evaluation, implementation support, customer communication, issue escalation, process improvement
Applications & Data: Python, JavaScript, TypeScript, SQL, React, Node.js, Flask, REST APIs, PostgreSQL, Azure SQL, MySQL, MongoDB, data validation, reporting workflows
Testing & Support: Functional testing, unit testing, integration testing, regression testing, PyTest, Mockito, troubleshooting, log analysis, monitoring, defect resolution, production support
Delivery & Documentation: Jira, Git, Jenkins, CI/CD, Docker, Azure, Agile, implementation planning, configuration documentation, user guides, training materials, operational handoffs, cross-functional collaboration

Projects

HMIS | Live | *Healthcare Workflows, TypeScript, REST APIs, Sentry*
- Built a healthcare workflow system with role-based access, scheduling, notifications, operational dashboards, and Sentry monitoring, reducing administrative workload 30% through validated application functionality and documented implementation workflows.

Chat2SQL | Code | *Java, TypeScript, SQL, Data Validation, Docker*
- Built a data-analysis tool supporting 10+ database systems with schema inspection, SQL generation, query validation, metadata exploration, discrepancy handling, automated testing, and clearly documented Docker-based implementation.

FinNexus | Live | *TypeScript, REST APIs, WebSockets, Kubernetes, MongoDB*
- Built a real-time platform supporting 50,000+ users and one million transactions, integrating WebSocket updates, failure monitoring, Kubernetes deployment, automated releases, and performance-tuned application services under high-volume workloads.
