Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Cloud-focused Software Engineer with 2+ years supporting business platforms on **AWS** and **Azure**, building integrations and pipelines, resolving production incidents, and running **Docker**, Kubernetes, and Jenkins CI/CD with security and documentation.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Software Engineering, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Designed multi-tenant storage on **Azure** SQL and Blob Storage with row-level security protecting each tenant's data for 500+ users, and tuned queries to cut dashboard latency from 1.2s to 350ms.
- Built and supported cloud **integration** pipelines across SQL Server, PostgreSQL, and cloud storage with reconciliation checks, resolving failures to sustain 99%+ reliability over 5K+ monthly jobs through CI/CD releases.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Deployed and supported a production platform on **AWS** with RDS, shipped through GitHub Actions CI/CD to Render and Vercel, serving 150+ instructors and 10K+ daily requests with stable peak-load responses.
- **Troubleshot** incidents such as OCR timeouts and model failures, adding fallback routing and batch processing that kept the platform stable at peak load and cut feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Maintained **Jenkins** CI/CD that allocated test VMs, built and installed executables, ran 20+ automated suites across Windows, Linux, and macOS, and emailed coverage reports and failure logs nightly.
- Redesigned **AWS** Glue and S3 data pipelines, boosting efficiency 68% and cutting storage costs 15%, while partnering with Microsoft and GitHub stakeholders to deliver API integrations in Agile sprints.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Deployed 8 microservices as **Docker** images to Azure App Services, provisioned with ARM templates through Jenkins CI/CD with approval-gated staging and zero-downtime releases, cutting deployment time 50%.
- Secured Azure SQL data with encryption, firewalls, and role-based access, and ran Snyk and OWASP **security** checks plus Sentry, Azure Monitor, and Kibana monitoring on every production release.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Gathered requirements with the client and presented the end-to-end **architecture** after mapping 12+ integration points, then built booking and payment APIs with responses under 200ms across 50K+ records.
- Integrated third-party payment providers through idempotent webhooks with PCI-compliant handling, automating refunds and disputes and cutting manual refund and dispute work about 70% across 50K+ booking records.

Skills

Cloud: AWS (EC2, S3, RDS, Glue), Azure, Azure SQL, Azure App Services, Azure Monitor, Blob Storage, GCP
DevOps: Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, ARM Templates, Git, Linux, PyTest, Root Cause Analysis
Security & Ops: Role-Based Access, Encryption, Snyk, OWASP, Sentry, Kibana, Incident Troubleshooting
Integration & Data: REST APIs, Webhooks, XML, JSON, ETL Pipelines, SQL, PostgreSQL, SQL Server, Firebase
Languages & Practices: Python, Java, JavaScript, SDLC, Agile, Documentation, Stakeholder Communication

Projects

HR Platform Integration Service | *Python, XML, XSLT, REST APIs, AWS Lambda*

- Designed an **integration** that pulls employee time and absence records from an HR system, transforms them with XSLT, validates required fields, and posts them to payroll with **audit logs**.

Validated Cloud Release Pipeline | *Docker, Kubernetes, Jenkins, Terraform, Azure*

- Designed a **CI/CD** pipeline with Terraform environments, container scans, approval records, and automated test evidence stored for each release, supporting **GxP**-style validation, audit, and change-control requirements for regulated systems.

HMIS – Hospital Management Information System Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*

- Won Smart India Hackathon with a **healthcare** platform providing consent-based patient record access through ABDM APIs, appointment workflows, Twilio alerts, and Sentry monitoring, reducing administrative workload 30%.
