Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years and three internships building **Java** and **Python** server-side services, JavaScript web apps, and secure transaction flows on **AWS** and GCP, with strong CS fundamentals, automated testing, and monitoring.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Software Engineering, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built fault-tolerant **AI job orchestration** with FastAPI workers, explicit job-state workflows, and failure isolation, processing 1K+ LLM jobs at 3x throughput without cascading failures under concurrent load.
- Designed multi-tenant storage with row-level security for 500+ users, cutting dashboard latency from 1.2s to 350ms, and **monitored** integration jobs to sustain 99%+ reliability through CI/CD releases.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a **model routing** layer across OpenAI, Anthropic, and Qwen inference APIs with dynamic switching, timeouts, and fallbacks, serving 10K+ daily requests for 150+ instructors on AWS.
- Logged model name, feature, token counts, and estimated cost for every call, enabling usage-based cost tracking across grading, rubric, and OCR features while cutting feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Designed **REST API** endpoints with pagination, field filtering, and caching for clients on low-bandwidth networks, improving response times 30% and cutting payload sizes across large-scale integrations used by distributed clients.
- Wrote 20+ automated unit and integration test suites with PyTest and Mockito, run nightly through Jenkins and GitHub-triggered branches across Windows, Linux, and macOS in Agile sprints.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built **authentication** with JWT, role-based access, and **billing** services in a **Java Spring Boot** microservices platform, syncing 2M+ records across locations through real-time WebSocket updates for customer and lead workflows.
- Shipped through Jenkins CI/CD with Docker and staged releases, and debugged production issues with Sentry, Azure Monitor, and Kibana, cutting deployment time 50% and reaching 95%+ successful build validation.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built customer-facing Flask APIs for bookings, pricing, and coupons with configurable eligibility rules, keeping responses under 200ms across 50K+ records with Firebase real-time updates on Android, iOS, and web.
- Integrated multi-currency payment providers through idempotent webhooks for refunds and disputes, cutting manual handling about 70%, and implemented wallet-signature login that removed password storage for wallet users.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, CSS, Bash
Server Side: Spring Boot, FastAPI, Flask, Node.js, REST APIs, Microservices, Webhooks, JWT
Web: React, Next.js, Responsive UI, WebSockets
Cloud & SRE: AWS, GCP, Azure, Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions, Sentry, Kibana, Linux
Data & Quality: PostgreSQL, MySQL, MongoDB, Unit Testing, PyTest, Mockito, Git, Code Reviews, Agile

Projects

Retail Order and Returns Service | *Java, Spring Boot, Kafka, PostgreSQL, AWS*

- Designed a **Java** service that processes retail orders and returns as events, keeps payment and inventory updates consistent with idempotent handlers, and exposes **REST APIs** for store and online channels.

Service Reliability Dashboard | *Python, React, Prometheus, Grafana, GCP*

- Designed an **SRE** tool that collects latency, error, and saturation metrics from internal services, alerts on service-level objective breaches, and links each incident to recent deployments for faster triage.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*

- Built a **customer-facing** platform on Kubernetes with CI/CD, Plaid bank linking, a token-based firewall, and real-time updates, supporting 50,000+ users and 1M+ transactions with MongoDB and Next.js.
