Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years in **test automation** with **Selenium**, Mockito, PyTest, and Jest, plus **API testing**, Java and Python microservices, SQL data validation, and Jenkins CI/CD pipelines in Agile teams.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built **data validation** and reconciliation checks across PostgreSQL, SQL Server, and cloud storage using SQL, catching mismatched records and sustaining 99%+ reliability over 5K+ monthly production jobs.
- Verified releases through **CI/CD**-backed deployments for a 500+ user platform, testing explicit job-state transitions and failure isolation that tripled throughput across 1K+ asynchronous jobs without cascading failures.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Tested and debugged Flask **REST APIs** such as upload and grade endpoints, reproducing OCR timeouts and model failures and validating fixes that kept 10K+ daily requests stable at peak load.
- Measured grading quality across 10K+ submissions at 90%+ consistency, and shipped changes through **GitHub Actions** CI/CD, cutting instructor feedback turnaround 60% for 150+ instructors in production use.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Built **test automation** that ran 20+ unit and integration suites in Java and Python with Mockito and PyTest nightly in **Jenkins**, installing builds on Windows, Linux, and macOS VMs.
- Generated CSV test reports, code coverage summaries, and failure logs through Jenkins notifications, and triaged **API defects** with Microsoft and GitHub stakeholders in Agile Scrum sprints and release cycles.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Wrote **Selenium** end-to-end tests and Jest unit tests for 8 Java Spring Boot **microservices** and a React frontend, gating every Jenkins release before Docker staging deployments and production rollout.
- Added Snyk and OWASP dependency checks, linting, and static analysis to the Jenkins pipeline with approval-gated releases, reaching 95%+ successful **build validation** across all release runs to production.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Validated booking, coupon, and payment **API** flows including eligibility, expiry, and usage rules, keeping responses under 200ms across 50K+ records on Android, iOS, and web clients during release testing.
- Tested idempotent payment webhooks for refunds, disputes, and chargebacks so repeated events never double-processed, cutting manual refund handling about 70% with consistent **payment status** across 50K+ booking records.

Skills

Testing: Test Automation, Selenium, Mockito, PyTest, Jest, Unit Testing, Integration Testing, End-to-End Testing
API & Data: REST APIs, Postman, API Testing, SQL, PostgreSQL, MySQL, SQL Server, Data Validation
Languages: Java, Python, JavaScript, TypeScript, Bash, Linux, Root Cause Analysis
CI/CD & Cloud: Jenkins, GitHub Actions, Git, Docker, Kubernetes, GCP, AWS, Azure
Process: SDLC, Agile/Scrum, Microservices, Spring Boot, Debugging, Code Coverage, Static Analysis, Snyk, OWASP

Projects

BDD Web Test Framework | *Java, Selenium, TestNG, Cucumber, Jenkins*

- Designed a **Cucumber** and TestNG framework with Selenium page objects, parallel cross-browser runs, Gherkin scenarios written with product owners, and Jenkins jobs that publish **reports** on every build.

Microservice API Test Suite | *Java, REST Assured, BigQuery, GKE, Cloud Storage*

- Designed a **REST Assured** suite testing microservices on GKE for contracts, status codes, and error handling, then validating results against **BigQuery** tables and Cloud Storage files with SQL checks.

CPU-Scheduling Simulator Live | *C++, React.js, JavaScript, EJ-2*

- Implemented and **tested** FCFS, SJF, SRT, Round Robin, priority, and multilevel queue scheduling across 1K+ process combinations, covering preemptive and non-preemptive edge cases and cutting turnaround 25%.
