Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **seller-facing web products**, **React/TypeScript interfaces**, backend APIs, data workflows, automated tests, and continuously delivered features informed by customer needs.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Translated stakeholder requirements into **customer-facing platform features** with FastAPI services, explicit workflow states, failure isolation, and monitoring, processing 1K+ concurrent jobs at 3x throughput for daily users.
- Built multi-tenant data integrations across Azure SQL, PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with **validation, CI/CD, and 99%+ production reliability** across production environments.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built **React and Flask product features** for uploads, grading, history, and feedback, supporting 150+ instructors and 10K+ daily requests while reducing turnaround 60% through incremental releases for daily workflows.
- Investigated bugs across secure ingestion, concurrent processing, REST APIs, and model fallbacks; coordinated fixes through **automated testing, code reviews, CI/CD, monitoring, and clear technical documentation** for teammates.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Designed object-oriented microservices and API integrations, improving response times 30% while collaborating with Microsoft and GitHub teams through **Agile planning, code reviews, feedback, and release coordination** with stakeholders.
- Automated **unit, integration, and deployment testing** with 20+ PyTest and Mockito suites, Jenkins pipelines, and cross-platform validation, increasing pipeline efficiency 68% and reducing technical debt 20% across environments.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built eight microservices for authentication, resources, billing, permissions, and notifications, using **REST APIs and event-driven WebSockets** to synchronize 2M+ records across distributed locations through secure services at scale.
- Developed **React and TypeScript user interfaces** with real-time dashboards, then supported releases through Docker staging, Jenkins CI/CD, Sentry monitoring, and root-cause troubleshooting across eight production services for users.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Translated client needs into **technical specifications and user workflows** for 12+ integrations, mapping bookings, payments, coupons, and real-time status behavior before implementation to reduce design errors 25%.
- Built React and Flask transaction features with Firebase, REST APIs, WebSockets, payments, and responsive delivery, supporting 50K+ records with **sub-200-millisecond API responses** during customer demonstrations and reviews.

Skills

Languages: TypeScript, JavaScript, PHP, Python, Java, SQL
Frontend & Backend: React, Next.js, HTML, CSS, Flask, FastAPI, Node.js, REST APIs, JSON, Microservices
Data & Product: MySQL, PostgreSQL, SQL Server, MongoDB, Redis, Data Modeling, Event Analytics, Feature Flags, A/B Testing
Cloud & Delivery: GCP, Amazon Web Services, Azure, Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions, Git, Continuous Deployment
Engineering: Agile, Scrum, Unit Testing, Integration Testing, Code Reviews, Debugging, Root-Cause Analysis, Monitoring, Documentation, Requirements Analysis, Cross-Functional Collaboration

Projects

SellerPulse | *PHP, React, TypeScript, MySQL, REST APIs, Feature Flags*

- Designed a **seller performance workspace** combining order fulfillment, response-time, review, shipping, and support metrics with configurable goals, progress explanations, actionable recommendations, and responsive React interfaces for independent merchants.

ExperimentRail | *PHP, TypeScript, React, MySQL, A/B Testing, Event Analytics*

- Built a **feature-flagged experimentation service** with deterministic assignment, exposure logging, seller-event instrumentation, metric dashboards, and guarded rollouts, enabling product teams to compare variants and document evidence-based launch decisions.

FinNexus | *Next.js, TypeScript, MongoDB, Plaid, WebSockets, Kubernetes* | Live

- Built a **customer-facing transaction platform** supporting 50,000+ users and 1M+ transactions with secure bank linking, real-time updates, advanced filtering, responsive interfaces, and automated Kubernetes deployments across cloud environments.
