Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Software Engineer with 2+ years shipping **TypeScript**, **React**, Node.js, and **Python** products on PostgreSQL and AWS, with document-heavy AI workflows, retrieval, well-tested and observable code, and CI/CD.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Advanced NLP, Web Technologies, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Data Retrieval, Software Engineering, Object-Oriented Programming, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Designed multi-tenant **PostgreSQL** and Azure SQL schemas with row-level security for 500+ users, tuning indexed queries to cut dashboard latency from 1.2s to 350ms while keeping tenant data isolated.
- Built Python services and integration pipelines with validation, reconciliation checks, and CI/CD-backed releases at 99%+ reliability, and restructured async **LLM** job processing to triple throughput across 1K+ jobs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a **document ingestion** pipeline for PDF, DOCX, and ZIP uploads with vision OCR and LLM evaluation, processing 1K+ files per batch behind a React interface for 150+ instructors.
- Shipped the platform end to end on AWS with GitHub Actions CI/CD, handling 10K+ daily requests with fallbacks and per-call **cost logging**, cutting feedback turnaround 60% at 90%+ consistency.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Built cross-platform data-sharing microservices from requirements to deployment with 20+ automated **unit and integration tests** in nightly Jenkins pipelines, cutting manual data entry 35% for business teams.
- Improved API performance with pagination, field filtering, and caching, improving response times 30% and cutting **technical debt** 20%, while redesigning AWS Glue ETL for 68% higher pipeline efficiency.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **TypeScript** React and Node.js platform on PostgreSQL with JWT authentication, role-based access, and REST APIs for customers, billing, and leads, syncing 2M+ records across locations.
- Added **observability** with Sentry, Azure Monitor, and Kibana and gated releases on Jest and Selenium tests in CI/CD, reaching 95%+ successful build validation and cutting deployment time 50%.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built a React and TypeScript dashboard and Flask APIs for bookings, pricing, and coupons with Firebase real-time updates, keeping core responses under 200ms across 50K+ **booking records**.
- Designed the end-to-end architecture and **presented it to the client**, then automated refund and dispute handling through idempotent payment webhooks, cutting manual refund and dispute work about 70% overall.

Skills

Languages: TypeScript, JavaScript, Python, SQL, Java, HTML, CSS
Full Stack: React, Next.js, Node.js, Express.js, FastAPI, Flask, REST APIs, Microservices
Data & AI: PostgreSQL, Azure SQL, Supabase, Row-Level Security, LLM Systems, RAG, Embeddings, FAISS, OCR
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD, GitHub Actions, Jenkins
Quality: Jest, Selenium, PyTest, Unit Testing, Integration Testing, Sentry, Kibana, Git, Agile

Projects

Audit Evidence Review Workspace | *TypeScript, React, GraphQL, Node.js, PostgreSQL*

- Designed a **GraphQL** and React workspace where auditors request evidence, clients upload documents, reviewers map files to SOC 2 controls, and every comment and approval lands in an **audit trail**.

Control Evidence Matching Service | *Python, FastAPI, Embeddings, PostgreSQL, LLM APIs*

- Designed a service that extracts text from uploaded policies and screenshots, suggests which **audit controls** each document satisfies using embedding search, and flags gaps for reviewer confirmation with **citations**.

Big-Brain Live | *LLaMA-2, FAISS, Pinecone, Clerk, Convex, PostgreSQL*

- Built a secure **document** platform with Clerk authentication, semantic search, summarization, and real-time collaboration over 50K+ documents, cutting document review time 60% for 200+ users with sub-second retrieval.
